

## Impero Education Pro and Microsoft

Impero Education Pro combines **classroom management**, **network management** and **online safety**, the three essential elements required to support digital learning across any Windows, Chrome, Mac and iOS devices.

Integrating with Office 365, Impero Education Pro provides a simple single sign-on interface with teacher-friendly control tools that can be used to support learning directly in the classroom or in a remote learning scenario.

### Classroom management

#### Features

- Cross-platform real-time monitoring
- Teaching tools and screen broadcasting
- Flexible grouping via ClassLink or Clever
- Messaging & chat
- Online testing
- Remote control
- Enforce acceptable use policies
- Restrictions and access
- Session tracking

#### Benefits

- **Focus learning** - monitor every student device and block certain websites and content to remove distractions associated with online learning and keep students on track.
- **Maximise learning time** - automate numerous classroom activities including push URL and logging students on and off machines, to streamline class preparations and improve student outcomes.
- **Address online behavior in real time** - identify inappropriate online behaviour or misuse as it occurs, so that incidents can be dealt with promptly.

### Network management

- Keyword detection
- Keyword detection libraries
- Capture management
- Context analysis
- Anonymous student reporting
- Reporting and analytics
- Audit trail
- Disable USBs
- Access management

- **Keep students safe** - detect early warning signs and alert staff in real-time, for early intervention in potentially high-risk situations before they escalate.
- **Promote good digital citizenship** - empower young people to navigate the digital world safely and responsibly, by educating them on risk and appropriate behaviour.
- **Provides contextual insight** - by capturing a screenshot or video recording, staff understand the context of a capture and can deal with incidents quickly and effectively.

### Student online safety

- Remote control and support
- Multi-site management
- Power management
- Geolocation tracking
- Device inventory
- Four-eyes authorisation
- Utilisation reporting
- Tech tools
- Print management

- **Identify root cause** - remotely identify root causes such as device running low on storage or new software versions available, to reduce manual processes and save time for technical teams.
- **Saves time** - allow network managers to respond to issues and fix problems remotely, increasing efficiency and reducing workloads.
- **Ensure transparency** - remotely view all devices in a single view with details or each device, providing technical teams with a complete, transparent view of the whole network.
