Solution Assessment:
Azure Migrate and Modernize for Legacy Applications

Determine the Best Path Forward for your Legacy Application

ACCELERATE LEGACY MODERNIZATION AND MIGRATION

This Solution Assessment is designed to help organizations evaluate a **legacy application's** readiness for migration and modernization in **Microsoft Azure.** Improving leverages cutting-edge **Generative AI-powered tools – Code Explorer and Data Explorer** – to provide deeper insights, accelerate assessment, and enhance migration planning. Our approach facilitates a smooth transition to the cloud, balancing cost, performance, and security considerations.

Addresses Common Legacy Application Challenges:

- **Lack of Documentation and SME Knowledge:** Many legacy applications have outdated or non-existent documentation, making assessments difficult
- **Limited Technical and Architectural Expertise:** Knowledge is often outsourced or limited to break/fix support, making deep analysis challenging
- **Evolving Business Needs:** A like-for-like rebuild may not align with current operational requirements, necessitating a strategic modernization approach

OUR ASSESSMENT APPROACH

1. **Discovery & Assessment**
2. **Modernization Strategy Evaluation**
3. **Migration Strategy & Roadmap**

DELIVERABLES

- **Solution Assessment Report** with findings and recommendations
- **Azure Migration and Modernization Roadmap** outlining phased implementation steps
- **Stakeholder Presentation** summarizing key insights and next steps

Engagement Duration: 4 Weeks

Investment: $40,000
