Cloud migration readiness assesment with an agile »think big, start small« approach

ABOUT In516ht:

Bringing together technology, business, and industry knowledge. Focused on migrations and modernizations of existing data platforms (Oracle Exadata, Netezza, etc.) with a cloud-first strategy and a proven migration methodology.

See what customers are saying:

"Choosing the In516ht service provider to deliver an end 2 end data analytics solution was a good decision. Their knowledge and understanding of the financial industry were crucial for successful project delivery because we were able to focus on use cases and not on explaining our business process and terminology during the data preparation phase.

– Ernest Dulič, IT Deputy Executive Director, Modra zavarovalnica

WHAT WE OFFER

Migrating your existing data system from on-premises technology to a cloud environment can be a very risky, challenging, time-consuming and complex process because you may need to rewrite the code for the ETL processes, reformat the data to fit the target and optimize it for the new platform.

Skip all of this. We can help you to significantly shorten the time-to-cloud as we have heavily invested in tools supporting data warehouse migrations from various on-premise databases – Microsoft SQL Server, Oracle Exadata, IBM Netezza, etc. to Microsoft Azure.

Empower your team with guided consultation in a series of in-depth interactive workshops. Our common goal here is to help you address questions of overall architecture, project management, and final services cost.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
