

- SPEC-DRIVEN DEVELOPMENT ADOPTION

Ship AI Code You Can *Trust.*

Formalize AI-assisted development on GitHub —
versioned, reviewed, and validated end to end.

- INBEST.CLOUD

W H Y C H O O S E U S

From Ad-Hoc Prompts to *Governed* Delivery

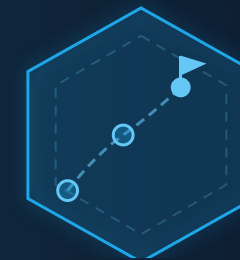

One Source of Truth

Requirements become a versioned spec stored in your GitHub repository.

Reviewed & Validated

Specs are reviewed like code and validated through GitHub Actions CI.

Real Feature Shipped

Delivered end-to-end, with an adoption guide and an autonomy baseline.

WHAT IS *INCLUDED*

- ✓ Diagnostic of current workflow and use-case selection
- ✓ Team training on the SDD methodology
- ✓ Hands-on delivery of one real feature on GitHub
- ✓ Guidance on spec review and CI validation
- ✓ Written adoption guide
- ✓ Team autonomy baseline measurement
- ✓ Executive readout at close

H O W I T W O R K S

Eight Weeks. *Four* Phases.

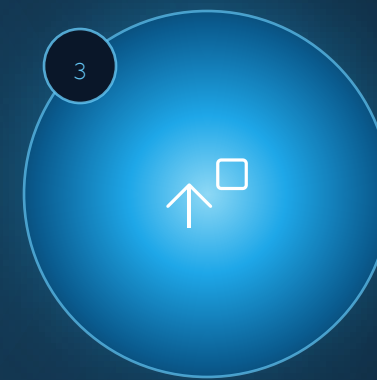

Discover

Diagnose the current AI-assisted workflow and select a real use case.

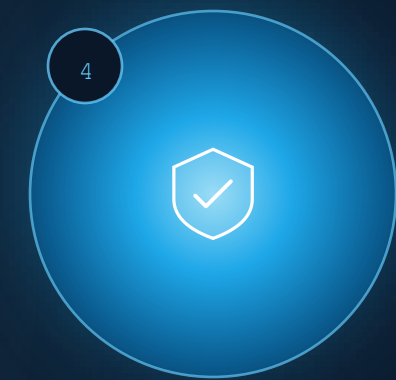

Foundation

Train the team on SDD methodology, the /sdd orchestrator, and work modes.

Build

Guided delivery: requirement → spec → implementation → validation.

Consolidate

Refinement, adoption guide, autonomy baseline, and executive demo.

Scope Your SDD Engagement *on* *GitHub.*

For development teams already using AI assistants who want governed,
auditable workflows.

8

Weeks

Four phases, one feature shipped end-to-end.

+4–6

Evolve add-on

Optional adoption check-in weeks after close.

Free

To list

Scope and pricing confirmed on the discovery call.
