

The Core Payroll for Business Central

Implementation Service

core Payroll

The Core Payroll for Business Central implementation service is a fast-track, comprehensive implementation service designed to meet social security legal obligations, providing companies with a robust and complete solution to manage their people.

In this service, inCentea Core configures, imports master data, tests, trains users and monitors the first monthly payroll with the customer, implementing the features described below.

Developed for:

Core Payroll for Business Central is a solution that allows you to process maturities using all the variables that may influence their calculation. This tool was developed for you in order to streamline and automate all payroll processing in your organization.

With this solution, users have the possibility to consult, change or delete a record quickly and simply, improving their work systems. Thus, Core Payroll for Business Central has the following features, and its use can go from a basic level, consisting of the daily actions of your organization, to a more advanced level, linked to various available parameterizations

Issuance of Receipts

Core Payroll for Business Central manages payslips and sends them via email to employees.

Issuance of the contract form history

So that you can have access to all the information, RH Visione allows you to issue the contract history of each of your employees.

Other available actions

Overtime processing; Registration and control of vacations; Recording of expenses; Accounting for salary; Payments; Issuing cheques or electronic payments; Annull processing; Expiration parameterization; Parameterization of items; Advanced simulations; Retroactive; Accounting configuration; Management of attachments; Configuration of dimensions; Alert system; Configuration of formulas; Configuration of units of measure.

Contract Management

in order to facilitate the control of contracts, RH Visione provides a list with information on all contracts close to their expiration, in order to notify the employer and the employee in advance, enabling the execution of the processes inherent to the renewal or departure of fixed-term contractors.

Payroll

By keeping your organization's Human Resources information centralized, HR Visione allows you to process salaries in an automated way, just a few clicks away.

Processing of extraordinary remuneration and deductions

You can carry out extra processing for payment, such as holiday allowance, Christmas, twelfths or commissions, and it is possible to associate other fixed or variable remuneration codes

Benefits for the user
