

Powering executive decision intelligence

What is Insight?

Insight is an AI-powered executive product that improves the quality and speed of organizational decision-making, before, during and after meetings. From better preparation pre-meeting to in-meeting instant recall to AI assisted post-meeting execution. It embeds intelligence into every stage of the decision lifecycle, enabling more informed, timely and confident discussions through built-in AI for forecasting, scenario planning, and decision insights.

Designed for board members, executive management, and key administrators, Insight brings structure, clarity, and intelligence to every discussion, giving your organization the edge it needs to lead with confidence.

Smarter, faster and more informed decision-making.

Key capabilities

During meeting

Enhance decision-making through real-time insights and a single source of truth throughout meetings.

FEATURES
Live Translation and Transcription
Live Insights
AI Chat
eVoting & Resolutions

Post-meeting

Streamline post-meeting reporting and follow up, enabling executives to stay informed and take action.

FEATURES
Decision extraction
Smart minutes
Smart action items

Who is Insight for?

LARGE ENTERPRISES & HOLDINGS

Group Companies, Conglomerates & Corporates

Large enterprises and holding companies manage decisions across multiple subsidiaries, committees, and leadership teams — often with fragmented information and inconsistent follow-through.

Insight unifies the decision layer across the portfolio, giving boards and executive teams a single intelligent system for preparation, deliberation, and accountability at scale.

GOVERNMENT & SOVEREIGN ENTITIES

Ministries, Sovereign Wealth & Public Holdings

Government leaders and sovereign bodies face uniquely complex governance challenges — politically sensitive, cross-ministerial, and publicly accountable.

Insight provides a secure, sovereign-ready decision layer that brings structured intelligence to policy discussions, ministerial committees, and public entity boards — replacing fragmented manual processes with traceable, AI-enhanced governance.

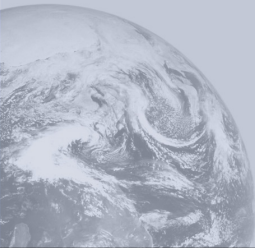

FINANCIAL INSTITUTIONS

Banks, Investment Firms & Listed Entities

Financial institutions operate under intense regulatory scrutiny, where every board and investment committee decision must be auditable and defensible.

Insight embeds AI-driven intelligence directly into the decision lifecycle — strengthening compliance, reducing reliance on manual board packs, and giving directors the contextual depth they need to govern with confidence.

Why Inception42

Proven at Scale

Live across government and enterprise ecosystems — deployed and trusted at national scale.

Frontier Innovation

Proprietary models including the world's first Arabic LLM — innovating at the edge of AI.

Sovereign Intelligence

Full data control with compliant architecture — intelligence you own and control.

G42 Power & Precision

National-scale infrastructure and delivery capability — the power of G42, the precision of Inception.
