

# (In)Business Process

*A no-code platform that accelerates enterprise AI deployments for complex business processes by enabling the rapid development of agentic AI applications.*

## No-Code AI Agent Builder

Design, test, and deploy AI agents rapidly without writing a single line of code.

## Multi-Agent Orchestration

Scale operations with AI agents that execute tasks autonomously or with human-in-the-loop approvals.

## 100+ Prebuilt Integrations

Instantly connect AI capabilities to enterprise systems like Salesforce, ServiceNow, and SharePoint, leveraging prebuilt integrations.

## Prebuilt Prompt Library

Tailor AI agent behavior to meet your specific business needs without heavy development resources, with 75+ prebuilt templates and fine-tuning options.

## Continuous AI Performance Optimization

Continuously monitor, refine, and optimize AI agent performance during build time. Drive better outcomes with real-time insights and model adjustments.

## Enterprise Scale

Scale effortlessly as your business evolves to stay agile in an evolving technology landscape.

**50% faster process automation**

**45% lower operational costs**

**75% faster approval processing time**
