

# ENVISION THE FUTURE OF YOUR FINANCIAL OPERATIONS

## Our experts are here to help you solve key challenges such as:

- Managing financial risk and reducing fraud
- Faster close cycles
- Greater cost through procurement and Budgetary controls
- Optimised free cash through better credit and collections
- Generating value with proactive insights
- Increased process automation through intelligent solutions

## Empowering intelligent finance

Financial Operations sit at the core of all businesses.

Regular changes to both legislation, compliance, emerging threats of fraud and cybercrime, alongside increased regulatory scrutiny make it harder than ever to manage your financial risk and prevent fraud.

You need to be agile and efficient while ensuring responsible, secure and compliant practices, to close skills gaps in your workforce and to maintain and improve productivity.

This is pushing organisations like yours to re-think how you operate your finances and financial value chain.

In this new reality, how do you envision the future state of your organisation? Build your Finance transformation strategy with Inciper and Catalyst, a proven and powerful approach to innovation.

## Let's think together

As part of Catalyst, meet with our experts who will facilitate an envisioning workshop, where we can form ideas together using design-led thinking concepts to jointly define how we can enable the digital transformation of your organisation.

This one-day workshop starts with a review of your business objectives, followed by mutual discovery and visualisation of solutions, ending with a clear, actionable picture of how we can help you reach your business goals.

## How Inciper can help

Inciper are a leading Microsoft Partner, passionate about driving business excellence for our clients, using Microsoft Dynamics 365 technology as a platform for growth to drive digital transformation

## What is Catalyst?

Build, plan, and execute business transformation strategies with a proven, innovative approach from Inciper and Microsoft – Catalyst. This is an envisioning and planning program that employs Microsoft Dynamics 365, the Microsoft Power Platform, and the Microsoft Cloud. Your business transformation starts with an I.D.E.A.

Start by finding the transformation strategy that's right for you. Define and prioritise your strategy using development activities, then foster the creation of ideas and drive decision making with an envisioning workshop.

### Inspire

Imagine a future state solution for your business

## Inspire your Future – with an Envisioning Workshop for Financial Operations

Inspire is the first phase of the Catalyst IDEA framework focused on development of your vision and strategy for Financial Operations. We work together to imagine and define the future state of your business through the Envisioning Workshop.

During the workshop we work with your Business Decision Makers (BDMs), to develop a flexible mindset, leveraging a human centred design thinking approach. This combines both creative and critical thinking, fostering the formation and organisation of ideas to drive decision making and situational improvements.

**The outcome of the Envisioning Workshop is the capture of new ideas and opportunities in the workshop output, which serves as the foundation for the remaining phases of the IDEA framework. Included in the output is a roadmap with prescriptive next actions your digital transformation.**
