Microsoft Entra Suite Engagement

Secure Access for the Modern Workforce

Microsoft

Increment's Microsoft Entra Suite Engagement will help you unlock the full potential of Microsoft's cutting-edge Entra Suite, the industry's most comprehensive Zero Trust identity and secure access solution, designed to empower and protect your workforce and customers.

Engagement Highlights

Deep dive into four game-changing Entra components bundled in the new Entra Suite:

Entra Identity Governance: Enhance the employee onboarding experience and automate identity lifecycle and access management across cloud and on-premises resources using any HR system of record.

Entra Private Access: Transition from traditional VPNs to a true Zero Trust model. Allow secure access to on-premises resources without a VPN, protected by Entra Conditional Access and phish-resistant credentials.

Entra Internet Access: Provide safe and seamless web interactions protected by the Entra Conditional Access with optimised Office 365 performance through Microsoft's global peering topology.

Entra Verified ID + Facecheck: Implement next-gen identity verification. Securely request and validate a user's identity during critical activities like help desk engagement and privilege escalation scenarios.

Engagement Objectives

1
Learn how to integrate your HR solution to empower employee lifecycle events and resource entitlements with Entra ID Governance.

2
Securely access and protect on-premises resources through Entra Private Access.

3
Create your very own Entra Verified ID and explore use cases and opportunities to streamline and secure identity verification experiences.

4
Gain hands on experience with Entra Suite in your own environment and surface untapped value from your existing Microsoft Entra investment.

Your Personalised Workshop Journey

Discovery	Customisation	Hands-on Demonstration	Future Planning
We collaborate with your teams, understanding current business challenges and identify Entra Suite solutions.	Tailoring the solution to your needs, we configure Entra Suite features in your environment of choice, with Microsoft provided trial licenses.	See Entra Suite in action with tangible, real-world demonstrations.	Receive a roadmap and recommendations for moving forward with a production implementation based on our experience delivering complex IAM and Governance projects.

What to expect

By the end of this engagement, our Microsoft Entra experts will provide you with:

- Discovery findings report on Entra Suite's use cases and deployment guidance in your environment.

- Actionable recommendations for HR integration, lifecycle workflows, and entitlement management.

- Configured lifecycle workflows and access packages with access reviews.

- Private Access configuration for on-premises applications protected by conditional access.

- Internet access web filtering policies that allow/deny traffic to designated websites.

- Verified ID setup and user credential issuance.

Why Choose Increment?

Increment brings extensive experience and expertise in designing and deploying Microsoft Entra solutions, including core IAM scenarios, HR integration, Identity Governance, Zero Trust architectures, and App and IdP migrations. We offer three key advantages:

- **Customised Approach:** We tailor each engagement to your specific needs, whether you're migrating from an existing solution, optimising your current configuration, or implementing new features in your Entra tenant.

- **Comprehensive Support:** Our end-to-end assistance covers discovery, planning, design, deployment, training, and operational change management, ensuring seamless business and user adoption.

- **Proven Results:** We have a track record of successfully helping organisations maximise their investment in the Microsoft ecosystem, strengthen their cyber defences, and thrive in the evolving digital landscape.

By choosing Increment for your **Microsoft Entra Suite Engagement**, you're partnering with a trusted ally dedicated to transforming your identity management. Let Increment be your catalyst for a secure, and future-ready identity solution.
