

# .NET APP MODERNIZATION ACCELERATOR FOR AZURE APP SERVICES & AZURE SQL DB

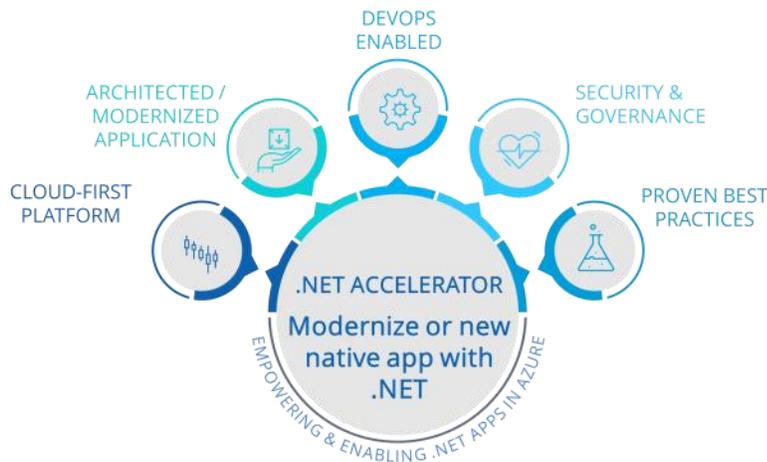

Unlock value and adopt the cloud for your .NET applications.

Are you looking to move one or more .NET applications to the cloud? Are you seeking speed, efficiency, and security? Companies are increasingly using Azure App Services and Azure SQL DB to realize competitive advantage. Others are benefiting from leveraging the cloud inherent scalability and resiliency qualities of these services. You can achieve these goals and more with InCycle's proven approach to application modernization.

InCycle's **.NET Application Modernization Accelerator for Azure App Services and Azure SQL DB** provides all the key components required for successful application modernization. Every aspect is designed to leverage cloud services and modern practices to drive business advantage. Cloud-first strategies and architectures provide levers to match IT and application goals. Be it scale, resiliency, security or advanced DevOps and governance, InCycle's packaged accelerator not only saves time and money, but also ensures companies can move forward with confidence and — peace of mind.

## DRIVING FACTORS

### Accelerate Innovation

Leverage cloud native technology and capabilities such as infrastructure as code, auto scale, security, and monitoring to deliver powerful modern apps.

### Simplified Maintenance

Infrastructure and delivery automation tasks like provisioning, patching and upgrading become rapid and governed processes.

### Scale Easily

Deploy your application across resilient scalable cloud-based resources.

### Adaptability

Deploy your application across resilient scalable cloud-based resources.

## KEY DEVOPS PRACTICES

State-of-the-art DevOps practices, like CI/CD infrastructure as code, helps teams deliver code faster and manage resources effectively.

## PROJECT PHASES

"InCycle's App Modernization Accelerator helped us unlock the promise of Azure and helped us realize the full value of our cloud strategy.

We saved valuable time and money leveraging InCycle's expertise from the start!"
