

End to End Payment Connector

by **INDEP**

SOLUTION OVERVIEW

It is an extension that allows the connection between the Dynamics 365 point of sale and the MIT Payment Center to execute payments by debit card, domestic or foreign credit card; as well as contactless means through the collection device at the point of sale.

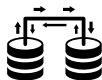

Main benefits

- ✓ Using pin pads connected directly to the POS avoids errors in amounts or selection of payment methods.
- ✓ Facilitates the reconciliation of cash transactions and interest-free months.
- ✓ Reduce the risk of errors or fraud when using terminals not connected to your point of sale.

Configured

Configuration of parameters in Headquarters of Commerce for manage credentials and payment methods by channel/merchant.

Connect

Sending the data to the Commerce components Cloud Scale Unit for your availability in all shops.

Use

Extension of the point of sale for interaction with the vendor pin pads.
