**Description**

## End to End Payment Connector

It is an extension that allows the connection between the Dynamics 365 point of sale and the MIT Payment Center to execute payments by debit card, domestic or foreign credit card; as well as contactless means through the collection device at the point of sale.

**Integrates with  
Dynamics 365 Commerce**

# Value Proposition

## Propuestas de valor

### Integrity

Integrate your collection devices with the point-of-sale app.

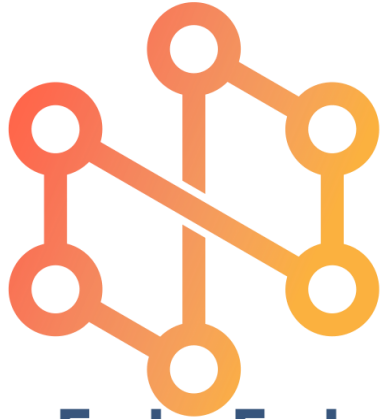

### Agility

Simplify the collection and return process, as well as reconciliation with acquiring bank transactions.

### Security

Reduce the risk of errors or fraud when using terminals not connected to your point of sale.

**Customer  
benefits**

## Customer Benefits

**01**

Using pin pads connected directly to the POS avoids errors in amounts or selection of payment methods.

**02**

Facilitates the reconciliation of cash transactions and interest-free months.

**03**

Increase the quality of service by avoiding delays or errors derived from collections with manual terminals.

## Customer Benefits

**04**

Simplify the collection process with debit, domestic or foreign credit cards, contactless means by integrating your collection devices with the point-of-sale application.

**05**

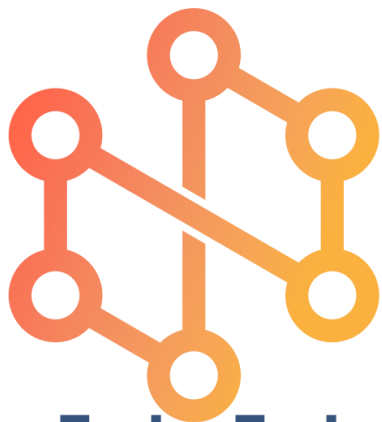

Reduce the risk of errors or fraud when using terminals not connected to your point of sale.

**06**

Make returns from the POS without the need to raise cases or tickets with the bank.

**07**

Streamline reconciliation with acquiring bank transactions
