

# The Underwriting Triage Solution

Consolidate fragmented submissions data, prioritize high-value opportunities, and reduce decision risk with with Agentic AI.

Underwriting triage often involves managing scattered submissions data that must be compiled and vetted before passing to downstream systems. This manual process can cause delays, inconsistencies, and errors, slowing the underwriting process.

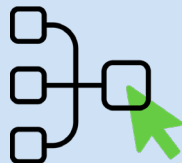

Indico Data's Underwriting Triage Solution transforms this process, enabling smarter, faster decisions. Our solution helps carriers prioritize key opportunities, consolidate data, and streamline decision-making. Gain full visibility into critical data for accurate risk assessment and pricing, with Agentic AI ensuring transparency and reducing decision risk.

Indico Data's Underwriting Triage Solution empowers insurance carriers to:

## Prioritize the highest value opportunities

Surface critical information instantly with AI-based scoring that helps identify and prioritize the highest-value submissions that meet your risk appetite.

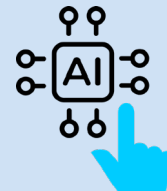

## Unify and streamline decisioning data flow

Consolidate key data from first and third party sources in one place, giving you the complete and accurate view for appropriate risk assessment and pricing.

## Interpret data quickly and accurately

Instantly locate and accurately interpret key data with AI-driven tools that save time and build institutional expertise.

## Reduce decision risk with traceable Agentic AI

Gain full visibility and confidence in every underwriting decision with a transparent, auditable process.

The Underwriting Triage Solution leverages the same cutting-edge technology trusted by leading insurance carriers

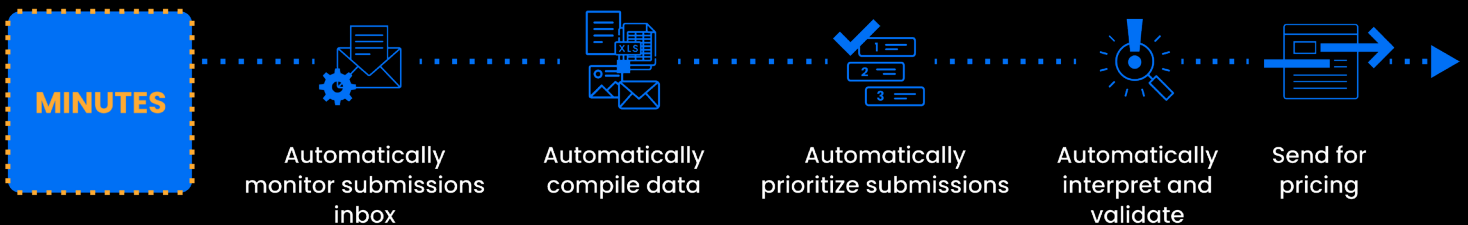

## Decision-ready underwriting
