

**Better data.**

**Better decisions.**

## Automate critical workflows with Indico Data's Submission Ingestion Solution

Insurance carriers handle vast amounts of unstructured data across applications, claims, and policies. Manual data intake is prone to errors and is resource intensive, delaying underwriting and claims processing. This hampers efficiency and slows service for brokers and policyholders. Transform submissions handling with automation that simplifies intake, improves accuracy, and accelerates decisions.

**Transform your decision-making process with Agentic AI that is:**

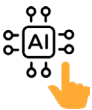

### Purpose-built for insurance

Our agents speak fluent insurance. From loss runs to MRCs, they handle every product line and document type—because they were built for this industry, not retrofitted for it.

### Quick to launch, easy to scale

Go live fast with out-of-the-box workflows that reduce manual effort, adapt easily to your processes, and scale across lines of business without slowing you down.

### Cutting-edge AI

Leverage Agentic AI that's built for real-world insurance documents, not just shiny demos. Get instant feedback, accurate results and AI-generated summaries that move decisions forward.

### Trustworthy and traceable

No black boxes here. Our traceable outputs are ready for regulators and ensure reliable results without hallucinations.
