Digital Transformation

Comprehensive offer that covers all the technological needs of a company

Offering

Capabilities

Set of capabilities that make us unique

Optimization

Professionals with extensive knowledge of Microsoft Dynamics 365 Business Central, which allows us to make **proposals for optimizing the solution.**

Expert team

We propose a **team with experience in implementation projects** with Microsoft Dynamics cloud solutions.

Important references in Microsoft Dynamics

We have **references of Microsoft Dynamics** implementations both in Spain and internationally.

Adapted maintenance service

Different dynamic maintenance modalities to adapt to the needs of our clients, offering an optimal service adapted to each phase of implementation.

Collaboration to ensure that the solution is aligned with the business objectives set by the client

Projects

Scope

360° vision of the needs of each business, optimizing the performance of Microsoft Dynamics to the maximum

User Experience

Solutions with user-centered designs, providing the best usability practices. Ensuring a natural and intuitive experience that materializes in effectiveness and efficiency

Solution

We have experience in Microsoft Dynamics, as a result of which we can propose the best technical solution for each of the functionalities identified in the scope of each project.

Projects that optimize business profitability

Teamworkers

+150

professionals with certifications and experience in many successful projects

Microsoft Support

- Premier Support (Partner Advantage Plan)
- 24x7 coverage
- Account management services

+ 20

Years of experience in implementing Microsoft Dynamics solutions

Key Users

Functions

Body responsible for decisions on the scope and scope of the project, strategic decisions and possible modifications in its planning. Functions:

- lead the project
- Evaluate the analyzes and proposals presented
- Progress Review
- Decision making on work team proposals

Body responsible for the project and the day-to-day of the work teams and the project. Principal functions:

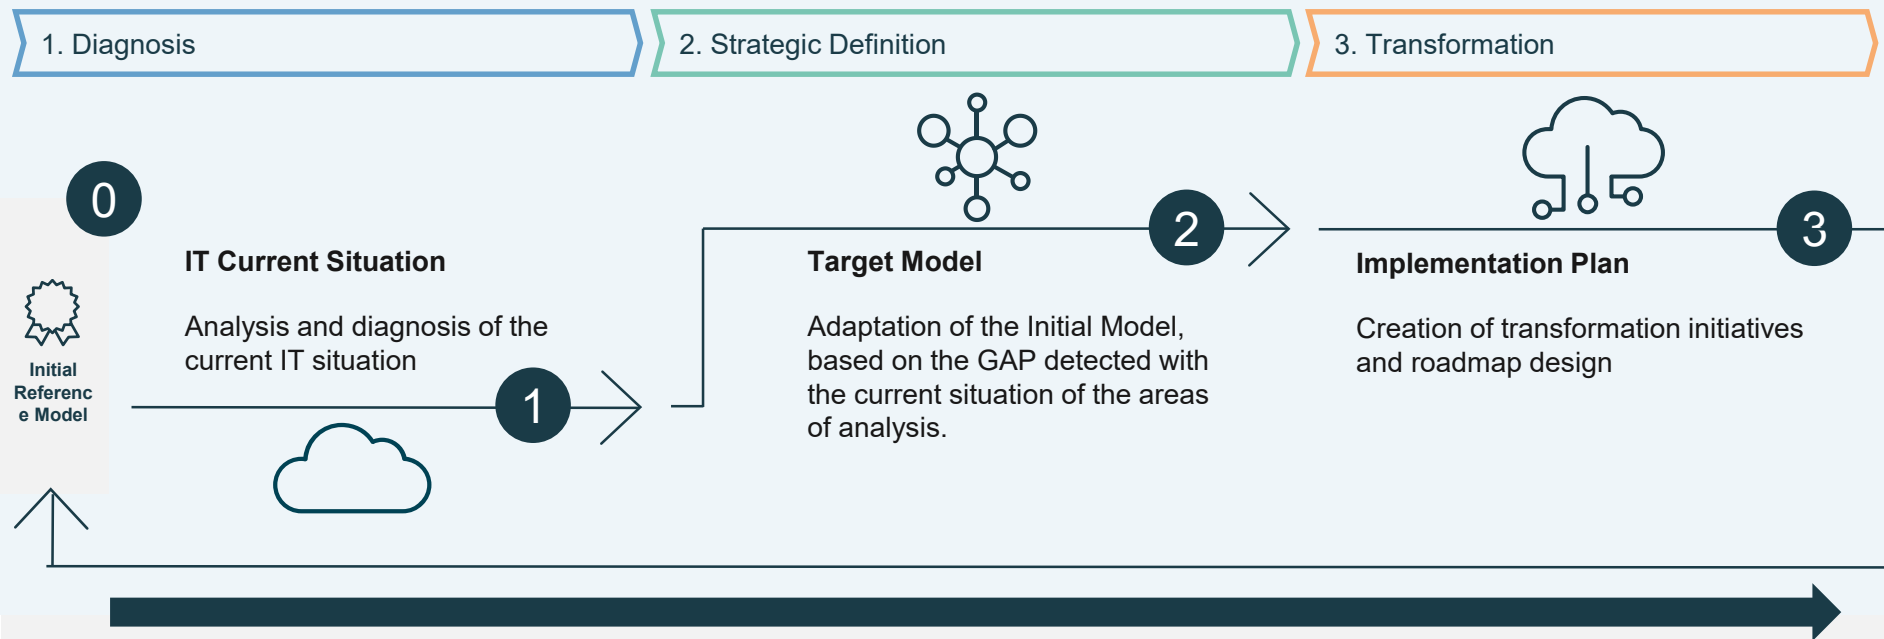

- monitor the project
- Ensure the quality of work
- Adhere to the schedule and established amplitude
- Operational Decision Making
- Lead and motivate the team

Responsible for the execution of the activities and tasks planned during the project:

- Develop day-to-day activities of the project
- Perform analyzes and draw conclusions
- Carry out the development and configuration of the tools
- Carry out the tasks associated with their validation
- Initial training on the capabilities of the solution
- Definition of good practices and quality assurance of deliverables

The success of a project is based on monitoring and control structures with the active participation of all the actors

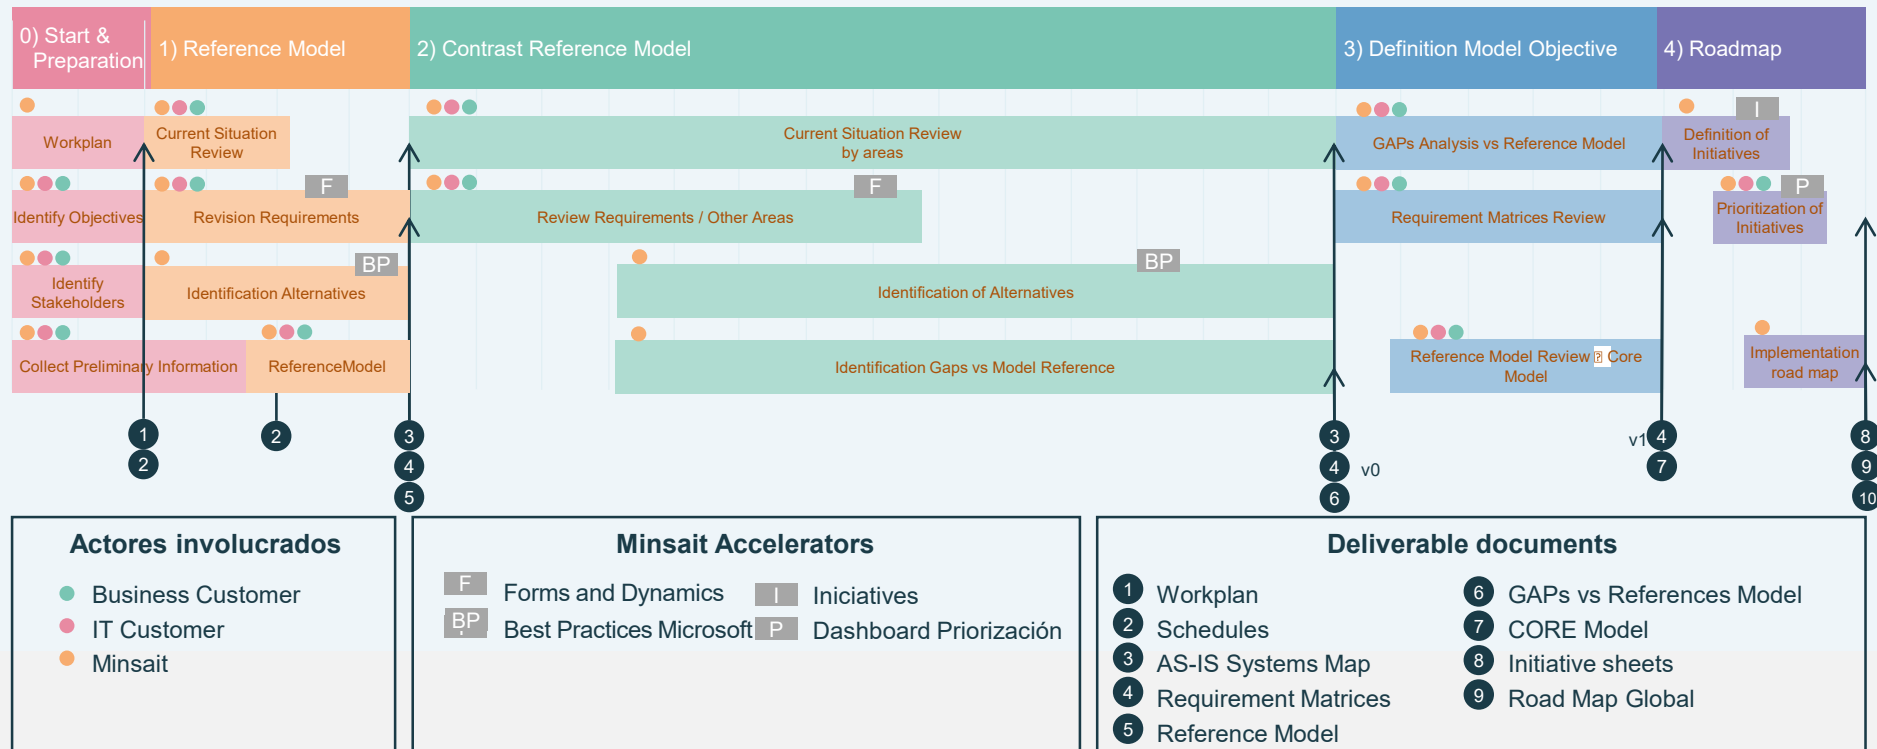

We have a methodology that allows us, starting from an initial **Reference Model**, to contrast it with the needs of the different areas involved in the scope of the project, until we reach the definition of the **Core Model**, on which the proposed implementation plan must be based.

From Minsait we offer to carry out a free study of the current situation of your ERP to show you how to implement Microsoft Dynamics 365 Finance & Operations cloud in your business

Assessment

Proposal with value results, activities and clear responsibilities

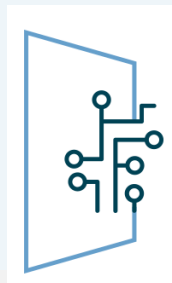

The use of the Best Practices and the Microsoft methodology allows the management of implementation projects throughout their life cycle in a centralized way for both the partner and the manufacturer and the client itself

Best Practices Microsoft

Following Microsoft's recommendations, we apply the best practices to optimize Microsoft Dynamics 365 solutions..

- **Decrease in the cost** of implementation and maintenance.
- Possibility of incorporating more easily the improvements to the product **periodically released** by the software manufacturer.
- Greater freedom when **selecting companies** capable of maintaining/evolving the system.

Accelerators
