

Simplified revenue accounting experience

minsait

An Indra company

Taking accuracy to the next level

Simplify and automate the revenue accounting processes, obtaining real time data and accurate results.

The airline sector is at front of a new global context, requiring the rethinking of the model in all its aspects. Data accuracy in real time is now necessary to enable the best decision-making. The importance of a reliable revenue accounting system, together with an industry expert and reliable team, makes the implementation and operation of the system a hassle-free process.

We at Minsait would like to accompany you in this journey with Onesait Airlines Revenue, a revenue accounting solution that can generate short-term impact on your business helping you reduce operational and infrastructure costs. Moreover, through the use of advanced technologies, it is prepared for industry changes such as NDC (New Distribution Capability)

Our value proposition

Onesait Airlines Revenue simplifies revenue accounting operations. It allows data updates in real time, offering a trustworthy and robust solution with a quick time to market.

Furthermore, Minsait offers a BPO with expertise in revenue accounting that will manage correctly on time the end-to-end operations.

It can also be integrated with our in-house payment platform: Onesait Payments.

Complete overview of revenue

Onesait Airlines Revenue gives full coverage to all Revenue Accounting processes and requirements, simplifying the model and ensuring the integrity and total control of information and revenues.

Accuracy

Onesait Airlines Revenue, web-based platform deployed in the cloud, for trustable results and reports.

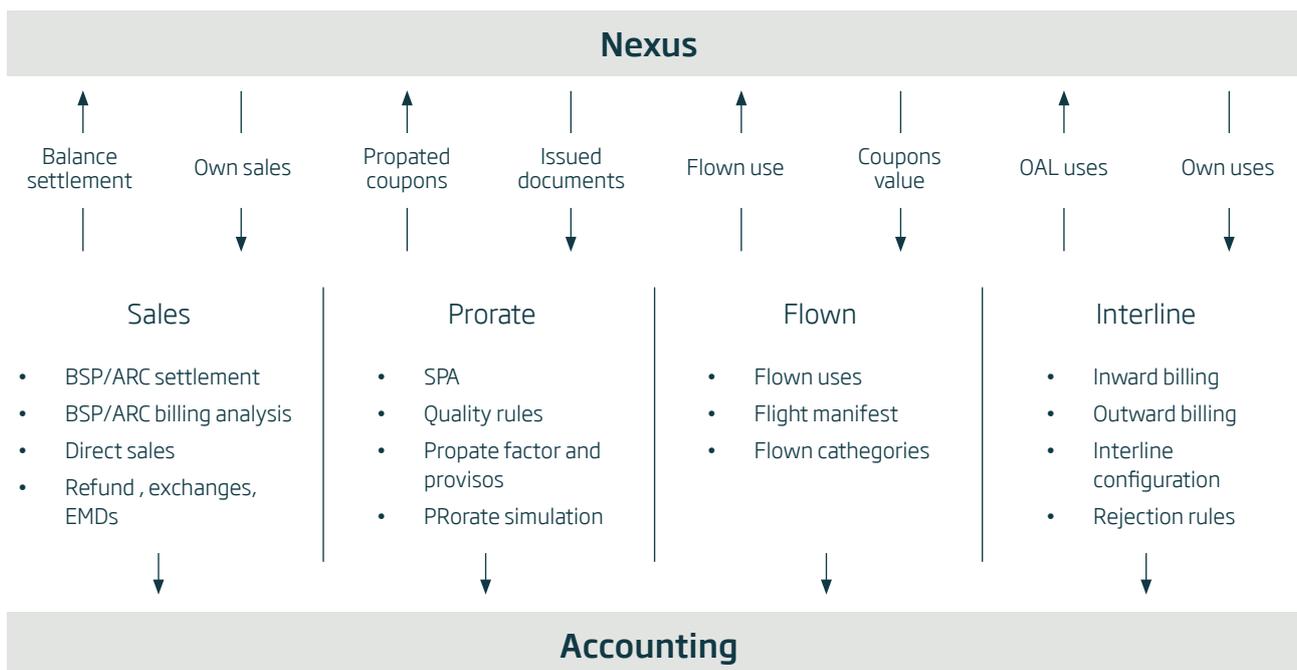

Parameter setup

Our product has been designed to satisfy your business needs through parameter and rules setup: accounting, currencies, prorating methods, quality checks, automation rules, and more.

Speed

Reduced 'time to develop' & 'time to market' means your IT can be much more agile in servicing needs of the business units or developers.

Independent and automated modular system
