

YOUR MANAGED VIRTUAL DESKTOP EXPERIENCE READY IN MINUTES

With the Managed Cloud Virtual Desktop, savings come from operational expense reductions from centralizing and reducing administration and hardware savings over time. It delivers faster desktop deployment, enhanced security, less downtime and lower support cost – and can enable a truly mobile workforce.

Desktop virtualization can also provide an answer to specific business needs, ranging from regulatory and compliance requirements, to requirements for specific or temporary workers, to supporting specific workloads.

Protect your
desktop

Work where
