

AI that works with your Documents

iNextLabs Analyzer revolutionizes document processing by leveraging AI to extract, analyze, and organize data from complex documents like invoices, contracts, and policies. It ensures accuracy, speeds up workflows, and provides actionable insights through automated classification and validation.

Advanced RAG (Retrieval-Augmented Generation)

AI-driven retrieval for precise and context-aware document insights.

Guaranteed Accuracy

AI-powered validation ensures high precision and compliance.

Intelligent Data Pre- processing & Ingestion Engine

Seamless structuring and cleansing of unstructured data.

Connectors for Multiple Sources

Integrates with databases, cloud storage, and enterprise platforms.

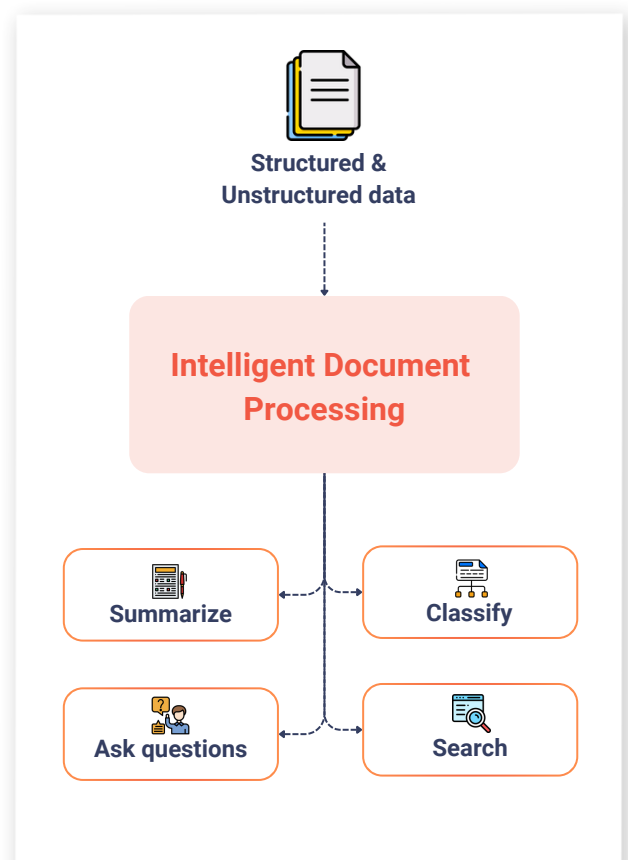

Data Governance Framework with Microsoft Fabric

Ensures secure, scalable, and compliant data management.

Automated Summarization & Insights

Extract key takeaways from lengthy reports and articles.

Why Document Intelligence is the Need of the Hour ?

80%

Reduction in manual document processing time through AI-driven automation.

50%

Faster Compliance Audits by streamlining contract analysis and regulatory checks.

99%

Accuracy in invoice data extraction, reducing human errors and financial discrepancies.

70%

Cost Savings by eliminating redundant manual data entry and verification.

Customer Case Studies

A Supreme Court from an Asian Country has already implemented our GPT-powered assistant to parse vast amounts of legal documents, distilling complex legal information into concise and accessible answers. This has significantly improved response efficiency and accuracy for legal professionals and the public.

A leading bank in Malaysia, has successfully implemented our AI-powered solution to transform how the bank's teams interact with contracts, policies, and regulatory documents. By integrating Generative AI-driven Document Intelligence, we enhanced searchability, policy analysis, and contract insights—empowering employees with faster and more informed decision-making capabilities.

Our Partners

iNextLabs is a Gen AI-focused company dedicated to making Generative AI accessible and transformative for businesses of all sizes. Headquartered in Singapore, with offices worldwide, we offer productized AI solutions tailored to various industries. We specialize in building truly intelligent applications powered by advanced Generative AI. With a proven track record of delivering enterprise-grade solutions for complex and mission-critical use cases, we are trusted by organizations globally to drive innovation and efficiency.
