

END-TO-END TRACEABILITY FOR A BETTER WORLD

INEXTRACK - The Central Tracking Repository for robust Supply Chain Tracking.

January 12, 2023

Microsoft Partner

DETECT COUNTERFEIT, OPTIMIZE SUPPLY CHAIN, INCREASE TRANSPARENCY

In an increasingly complex world, where illicit trade is on the rise, manufacturers and distributors are seeking visibility, control and optimization of the supply chain, while being compliant and ensuring both customer and consumer trust

CHALLENGES

- Control & optimize supply chain
- Effectively recall products in case of issues
- Comply with international regulations
- Use cost-effective, standardized and easy-to-use solutions
- Detect counterfeits

IDEAL SOLUTION

- Data Analytics – Central Database
- All-in-one modular solution, turn-key, flexible, cost-effective and simple deployment

DESIRED OUTCOMES

- Optimized and transparent supply chain
- Market trust & consumer fidelity
- Control and visibility over the whole product lifecycle
- Compliance to regulations
- Money and time saving
- Sustainability

The screenshot displays the INEXTRACK web application interface. At the top, there is a navigation bar with the INEXTRACK logo and user information. Below this, there are tabs for Auditing, Regulation, Tracking, Master Data, Administration, and Help. The main content area is titled "3-3 DISPATCH MESSAGES" and includes a "Create Return from DN" button. A filters section allows users to refine data by Scanning Location, Business Entity, Transaction Date, Delivery Note, Message Status, Transport Identifier, Transmissions, and Internal UID. The main table lists various transactions with columns for Delivery Note, Destination, Transaction Date, Quantity, Items, Master Data, Transport, Customs, Message Status, Is TPM, Submit, and Recall. The table shows multiple rows of data, including transactions for various companies and dates.

Delivery Note	Destination	Transaction Date	Quantity	Items	Master Data	Transport	Customs	Message Status	Is TPM	Submit	Recall

INEXTRACK

INEXTRACK is our global repository and central tracking solution that provides visibility into supply chain event data at all stages of product movement and aggregation, from manufacturing to final point of sale.

This tracking system is an integral part and directly linked to the components of the INEXTO Suite, which includes our unique product serialization and digital authentication solutions for many industries: Automotive, Food & Beverage, Luxury, Life Sciences, Textile, Tobacco, Watch, and more.

INEXTRACK can interface with many data architectures, including the EPCIS standard, and will alert stakeholders to supply chain issues by leveraging robust data analytics and extensive visibility of tracking data.

1

FULL PRODUCTION, DISTRIBUTION, SUPPLY CHAIN & RECALL CONTROL

Full control of the distribution up to P.O.S, supply chain optimization, powerful recall capability

2

REPORTING & REAL TIME STATISTICS

Tailored Reporting, statistics on time to delivery, sales, alerts and intelligence, CO2 analysis

3

FLEXIBLE, STANDARDIZED & COMPLIANT

GS1 - EPCIS repository, supports combination of regulations, ensures completeness of information reported to governmental repositories

Inexto, INEXTRACK & Microsoft Azure

INEXTRACK based on Microsoft Azure's cloud capabilities, delivers a scalable and cost-effective solution enabling large multi-national and small-to-medium customers to comply with track and trace regulations. Managing vast volumes of data collected across the entire manufacturing and supply chain, INEXTRACK on Microsoft Azure currently processes more than 150BN consumer items per year, whilst ensuring compliance to 40+ traceability regulations.

Cost effective services based on managed scalability

Azure's scaling-on-demand ensures robust services are delivered at the right price and right time for the customer

Delivering mission-critical compliance based on active service management

Utilizing Microsoft support and inbuilt failover and resilience of the Azure cloud to deliver uninterrupted services

Supporting big-data analytics

Delivering real-time reporting and value-add analytics

Customer success: Philip Morris International

“I certify the exceptional industrial execution and operational deployment of the INEXTO technology on our global production lines.”

Rodney Schaddee Van Dooren, Director Illicit Trade Prevention, Philip Morris International

EXCELLENCE SINCE 2019

INEXTO Technology has been deployed since March 2019 for the implementation of a marking and identification system for tobacco products.

HIGH SPEED SOLUTION DEPLOYED

The solution deployed on high-speed production lines (>50'000 packages/h) allows products to be traced back to their point of sale through individual product identification and aggregation.

FULL COMPLIANCE

The solution provides the competent authorities with the means necessary for the proper performance of their mission and ensuring PMI full compliance with regulatory requirements.
