

Power Platform Copilot can bring many benefits to both makers and users of apps. Here are some of them:

- **Save time:** You can build and use apps faster and easier with natural language instead of coding.
- **Learn new skills:** You can learn Power Apps and Power Platform concepts from Copilot as you build and use apps.
- **Get proactive recommendations:** You can also get insights from Copilot on how to optimize your data analysis and decision making.
- **Improve user experience:** Provide a conversational and personalized experience for your app users with Copilot. You can also enable them to access information from multiple sources without leaving your app.
