Product Challenger

Next-Gen ADM Services

- Application Managed Services (2024 APAC)
- Application Quality Assurance (2024 APAC, 2023 US)
- Application Quality Assurance (2024 US)

Healthcare Digital Services

- Payer Transformation (2024)
- Provider Transformation - EHR (2024)

Digital Engineering Services

- Intelligent Operations (2023 Eur)
- Design & Development (2023 US)
- Customer Engagement and Experience (2023 US)

Others

- Data Center Services – Public sector Managed Services (2025 US)
- Platform Implementation Services (2023 US)

Market Challenger

- Agile Application Development (2023 US)

Rising Star

Digital Engineering Services

- Intelligent Operations (2023 US)
- Design & Development (2023 Eur)
- Platforms and Applications Services (2023 Eur)

Challenger

- Customer Engagement and Experience (2023 Eur)
- Provider Digital Transformation Services (2021 US)
- BPaaS Payer Services (2021 US)

Paragon 2023 Awards

- Finalist – Excellence: Recognized for outstanding delivery by a service provider.

Core Banking Migration to Azure

Unlock Agility, Security, and Innovation

In today's fast-evolving financial landscape, banks and financial institutions face increasing pressure to modernize their core systems while maintaining compliance, security, and operational efficiency. Migrating core banking systems to the cloud is no longer just an option—it's a strategic imperative. As a trusted IT services provider, we guide financial institutions through every step of this transformation, ensuring minimal disruption and maximum value.

Enhance Agility

Quickly scale resources up or down in response to market demands.

Reduce Costs

Lower infrastructure and maintenance expenses while optimizing operational efficiency..

Boost Security & Compliance

Leverage cloud-native security tools and adhere to industry regulations.

Accelerate Innovation

Deploy new digital services faster, improving customer experiences and competitive positioning.

Minimize Risk

Reduce migration downtime and safeguard critical financial data with expert-led processes.

End to End Migration to Azure

Assessment, Design and Architecture

Our Azure Cloud Assessment and Planning stage evaluates the current IT infrastructure, applications and business, to determine cloud suitability.

We then develop a comprehensive and tailored strategy and roadmap for a successful core cloud migration.

App Migration

We develop detailed plans for migrating applications and integrations with minimal downtime and disruption.

Our migration approach creates migration waves with the least dependent applications first, followed by other applications, databases and finally the core banking application.

DevOps / IaC

We have automated the provisioning of identified cloud environments, accelerating development cycles.

By using Infrastructure as Code (IaC), we have ensured that deployments are more consistent, repeatable, and efficient.

Database Migration

Our migration approach covers all possible data scenarios such as Oracle on-premise to Oracle on Azure, Transaction data and Oracle to Redshift migration, ensuring minimal disruption and optimized performance in the new cloud environment.

Cloud Hosting

As an Authorized Microsoft Cloud Solution Provider, we resell Azure services, enabling us to provide complete hosting services.

We monitor performance, optimize workloads, and offer managed services for ongoing maintenance and innovation. This enables continuous cost savings, improved efficiency, and access to evolving cloud capabilities.

Infinite Differentiators for Core Banking Migration

Cloud CoE

Infinite Cloud CoE with strong cloud technical capabilities and expertise in banking domain.

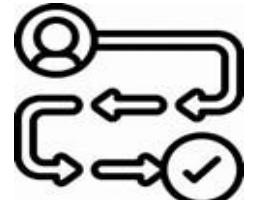

Distinguished Capabilities

Pool of enterprise architects to assess current state and define future cloud strategy roadmap.

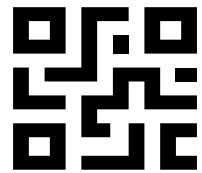

Experienced Team

Expert team of consultants and Azure certified engineers

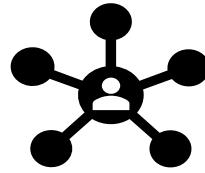

Tools & Accelerators

Our InfiniGrid and partner based tools & accelerators industrialize, automate, de-risk & accelerate cloud journey

Global Talent

Agile & scaled global talent across onshore, nearshore, offshore

Microsoft Partnership

Partnerships with Microsoft to unlock cloud credits, incentives, rebates, PoC funding, & migration funding
