

Product Data Sheet

UNITE: ERP Quick Start_

Product definition_

As a business owner, are you concerned about navigating the technical complexities and achieving the desired ROI with your Microsoft Dynamics 365 Business Central solution?

Implementing a Business Central solution requires specialist technical skills that may not be available in-house. This makes it challenging to implement, support, monitor, and process change requests effectively.

With over 100 successful Business Central implementations under our belt, we know how to get you up and running quickly - with a fully featured Business Central solution to ensure it meets your company goals and objectives.

Infinity Group's UNITE: ERP Quick Start_ is a tailored rapid deployment program for Business Central covering data migration, implementation, configuration, training, and support, ensuring the solution meets business goals and delivers ROI.

Risks_

- ✗ **Technical Skills:** The need for specialised technical skills to implement, support, and process change requests effectively.
- ✗ **Configuration and ROI:** Ensuring the Business Central solution is correctly configured to deliver value, meet business goals, and provide a strong return on investment.
- ✗ **Data Migration:** Managing the time-consuming and complicated process of migrating data, including potential manual cleaning and transformation due to inconsistencies or errors.
- ✗ **Customisation and Compatibility:** Addressing potential compatibility issues with customisations and configurations from the old ERP system, which may require additional development or modifications.
- ✗ **User Training and Integration:** Facilitating user training adoption, while also ensuring seamless integration with other essential systems used by the organisation.

Benefits_

- ✔ **Faster Implementation:** Working with you to migrate your data, our UNITE: ERP Quick Start program is designed to help your business get up and running with Business Central quickly and easily.
- ✔ **Reduced Training Time:** A highly skilled Infinity Group Business Central specialist will provide comprehensive training to your business users meaning they can get up to speed with the software quickly.
- ✔ **Improved User Adoption:** The UNITE: ERP Quick Start program helps users get up and running with the software quickly. As a result, they are more likely to adopt the software and use it more regularly. This leads to increased productivity and improved outcomes for your business.
- ✔ **Improved System Performance:** Business Central is a complex system. By utilising the Quick Start approach, we can ensure your solution is configured correctly first time and specifically tailored for your business.
- ✔ **Expert Support:** With access to our experienced technical support teams, businesses can benefit from expert guidance enabling you to resolve issues quickly and minimise downtime.

Key Features_

With UNITE: ERP Quick Start_, a highly skilled Infinity Group Dynamics Business Central specialist will work with you to understand your specific business requirements to ensure the Business Central solution meets your company goals and objectives.

- ✗ We'll ensure that data is properly prepared then ready to upload into Business Central, starting with customers and their opening balances.
- ✗ We'll provide comprehensive training including identifying the specific training needs of the users, including their job roles, level of expertise, and specific tasks they will perform using Business Central.
- ✗ User Acceptance Testing (UAT) will be performed to verify Business Central is working as expected before moving it to the production environment.
- ✗ Our Managed Service gives you access to our team of experts whether there is an issue you need our assistance with or you are looking to make changes to your implementation."

UNITE: ERP Quick Start_ Pricing
