

INFIONIC

DIGITAL TRANSFORMATION

TABLE OF CONTENTS

SCOPE OF THE PRESENTATION

1 OUR VISION

The reason for our existence. Explains the reason we are in business and what we are trying to address. See how our vision will serve you.

2 OUR HISTORY & TEAM

A proven track record and a team of experts that understands how to control features and complexity to meet all your requirements.

3 FEATURES

Learn about the features. Experience the extreme configurability that makes it feel like the product was made just for you.

4 EXAMPLE SCREENS

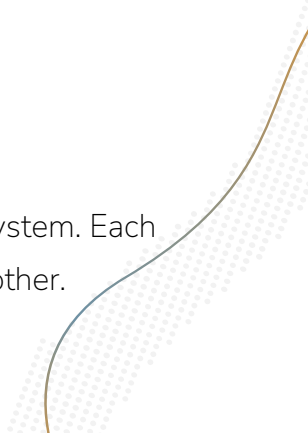

Screen shots of the product that will help you visualize the product and see how easy and simple it is to use.

5 PRICING & TIMELINES

See how you can begin using the product. Milestones and timelines for Development, Configuration and Implementation

6 OTHER PRODUCTS

See all the other products that belong to the same eco system. Each can exist independently or together with any one of the other.

OUR VISION

OUR ORIGIN STORY

Infionic's founder, Subbu, managed IT Services for Big Pharma in New York for a better part of a decade. During his time there, he always came across IT Products and Solutions that operated in Silos mirroring traditional organizations designs. He always harboured a notion that modern IT Solutions should help breakdown Silos rather than reinforce them.

Tired of spending time on the side-lines, he started an organization with a vision to develop a series of small products that work within each Silo while are closely connected to each other to create a network of information that help organizations take well informed decisions.

Subbu saw an analogy of his vision. He related information in an organization to ions in a crystal. Just how individual ions come together to form brilliant crystals, he saw that information coming together can create equality magical events in an organization.

Breaking down Silos using Technology

OUR HISTORY & TEAM

WE DID, WE LEARNT, WE INNOVATED

2012

Moved company to India and started product development. Signed First Client within the 3 months company start up in Pharmaceutical Industry

2015

First Productized version of ERP completed that can be configured for each customer. Infonic migrated from a custom solution to a complete and product and solutions company.

2018

Launched Cloud operations making product deployment extremely easy. First Client of Quality Management Systems added for complete Quality Operations. Also started deployments outside of India in Malaysia, US and UAE.

2021

New Age Cloud and SaaS Products with 21CFR Qualification out of the Box with minimal configuration and customization. Products are extremely easy to deploy and fragmented to meet each customer's specific needs.

SUBRAMANYAM (Subbu)

PROMOTER & ARCHITECT

IIM & BITS Graduate. Worked in Pharma IT Solutions for over a two decades.

SANDEEP

PROMOTER & PRODUCT STRATEGIST

Graduate from Stanford and MIT. Led Organizations in Pharma, Food & Beverage, Oil & Gas. Brings in Extensive Domain Knowledge.

Electronic Document
Management System

SNAPDOC FEATURES

POWER PACKED & EASY TO USE

- Electronic and Pre-Approved Documents
- Creating Document Classifications
- Control who views, prints and downloads
- Electronic Signatures and Custom Workflows
- Manage all Past Versions and control access
- Print Overlay and Template Management
- Link and Associate Documents together
- Mobile App to Access Favorites

MANAGEMENT

- Determine which documents are issuable
- Issue documents and maintain records
- List out all Controlled Copies and Locations
- Reconcile, Archive and Destruction Records
- Ensure Copies are reconciled before new Version
- Issue & Reconcile Mftg. Docs with Checklists
- Issue & Reconcile Analytical Docs with Checklists
- Uncontrolled Copies with Overprint Overlay

DISTRIBUTION

- Justifications for every Action (Save or Submit)
- Role Based Permissions for All Actions
- eSignature Agreements in User Profiles
- Data Back up Services including Audit Trails
- Ensure Training is done before docs are effective
- Change Control Programs for New Documents
- Print only on Authorized Printers
- Never download documents to the system

COMPLIANCE (21CFR.11)

- Roles and User with Authorizations
- Access Controls for Locations, Departments
- Mobile Device access Controls
- Permissions for Print, Download and View
- Determine who see's which Document types
- Manage Favorites on Mobile Devices
- Escalation or Alerts for upcoming timelines
- Track who is viewing which document when

LIST OF DOCUMENTS

FIND ANYTHING YOU NEED AT ONE PLACE

The screenshot displays a document management system interface. At the top, there are tabs for 'Documents', 'Issued', and 'Controlled'. Below these is a search bar and an 'Advanced Filters' button. The main area shows a table of documents with columns for Name & Number, Classification, Loc, Dept, Associations, Dates, Approval Type, and Status. An 'Initiate' button is visible in the top right corner.

Name & Number	Classification	Loc, Dept	Associations	Dates	Approval Type	Status
sdfs01 Associated Document Associated Document Associated Document Associated Document Ver : 1	C Procedures(P00) SC Annexures/Templates T ReviewPerYES	L U-1 D Eng	M NA E NA	A 01-Feb-21 E NA	Electronic	Approved
sdfd01 Primary/Parent Document Primary/Parent Document Primary/Parent Document 001 Ver : 1	C Procedures(P00) SC Annexures/Templates T ReviewPerYES	L U-1 D IT				
dsfjk1 Associated Document Associated Document Associated Document Ver : 1	C Procedures(P00) SC Annexures/Templates T ReviewPerYES	L U-1 D ADL				
PDG01 Primary/Parent Document Primary/Parent	C Procedures(P00)	L U-1				

The 'Advanced Filters' panel is open, showing options for Location, Department, Type, Status, Approval Type, Material, Equipment/Inst, Review Pending, and Date. The 'Status' filter is set to 'All', and the 'Approval Type' filter has 'All' selected.

A context menu is open over the document 'RPY123', listing the following actions:

- View Document
- Quick Edit
- Issue Document
- Controlled Print
- Uncontrolled Print
- Print History
- Change History
- Initiate Change
- Past Versions

Search and find everything you need with each and complete a variety of operations based on what permissions you have right from one place.
