# Azure Purview Fast Start: Readiness Assessment & Roadmap (10 day)

**Microsoft Azure**

## ABOUT INFOCENTRIC

InfoCentric is a cloud data and analytics consultancy, serving enterprise and public sector customers to strategize, design and implement data governance operational models including Azure Purview. Since 2009, our data governance services have enabled customers to fully realize the value of their cloud, SAAS and on-premise data assets and adopt data driven cultures for business success.

## WHAT WE OFFER

### WHAT IT IS
A consulting assessment to understand how the Purview data governance solution can advance your organisation's approach to data governance.

This activity is suitable for any organisation that wants to understand how to map Purview to achieve data governance outcomes with your Microsoft Azure data estate.
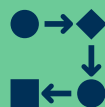

**Cost $25,000**

### KEY ACTIVITIES
Stakeholder interviews and workshops to gather information around Data Governance Business Use Cases and prepare a Purview Implementation Roadmap.

The assessment typically takes 10 days and can be modified to cater for larger, more complex and in depth assessments.

### METHODOLOGY
InfoCentric's unique and proven Data Governance Implementation Framework focused on:

Executive Sponsorship and Business Value Identification;

Data Ownership and Accountability Model;

Data Policy Framework for principles and standards;

Purview Data Governance Implementation checklist

### OUTPUTS
An Executive level Purview Implementation Roadmap.

The Report will align and prioritise Purview use cases to maximise business value.

The Roadmap Report is typically used as a precursor and input into an initial Purview data governance solution implementation.

## BENEFITS OF OUR SERVICES

*The Fast Start Readiness Assessment and Roadmap prepares your organisation for an implementation of the Azure Purview data governance solution. The Fast Start engagement aims to accelerate an organisation's data governance journey, with minimal risk and alignment to business outcomes.*
