

## Elevate Your Developer Experience with InfoMagnus and Copilot

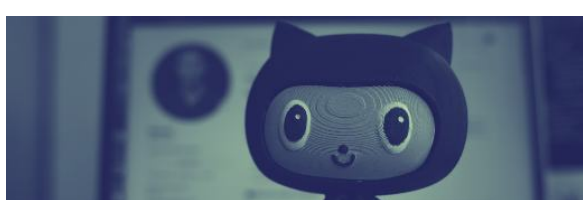

Copilot's precision meets InfoMagnus' insight.

When it comes to software development, efficiency is paramount. **InfoMagnus champions an enriched Developer Experience (DevX), aligning productivity with quality.**

Copilot allows developers to focus on innovative problem-solving. Whether it's accelerating code-writing, aiding in exploring new programming languages, or simply serving as an on-demand advisor, Copilot is essential in curbing developer fatigue and boosting productivity.

Our approach is grounded in understanding. **Before any implementation begins, our team dives deep into your current development processes.**

By identifying areas where developers may face hurdles, we tailor our Copilot integration strategy to address those specific challenges, ensuring a seamless adoption and immediate benefits.

# COPILOT

Certified Copilot experts, pioneering tailored development solutions.

## 1 Copilot Set Up:

We want to understand your unique use cases for Copilot – who are the users, teams and organizations that you want to launch Copilot with? What are the policies and spending limits?

Knowing this helps us set up and tailor your Copilot usage specific for your client.

## 2 Training and Enablement:

But our support doesn't end at implementation. Recognizing the nuances of Copilot, we provide dedicated training sessions for teams.

This ensures they're not only familiar with the tool but also well-versed in its optimal use cases, methods, and the myriad benefits it brings to the development table.
