Data Center IaaS Migration:

## 4-Week Implementation

Price: $ 15 000 (estimated)

Gain more from your solutions and applications with a cutting-edge cloud platform. Seamless migration of your data centers to Azure will unlock new capabilities thanks to faster processing, simpler management, and flexible configuration.

Infopulse, as a Microsoft partner with the Windows Server & SQL Server Migration to Azure and the Linux & Open Source Databases Migration to Azure advanced specializations, has the expertise to enable smooth, the hassle-free transition of all your assets to the cloud.

TO SUCCEED IN CUSTOMERS' DATA CENTER IAAS MIGRATION TO AZURE, WE RELY ON THE FOLLOWING:

Gathering the requirements of the on-premises infrastructure.

Creating new or modifying the existing infrastructure in Azure.

Architecture session with the customer experts to discuss and to create the optimal architecture in Azure.

Migration of all chosen objects to the Azure infrastructure.

Automation for the migration process.

Optimization of the Azure infrastructure.

APPLICATION AND DATABASE MIGRATION ACTIVITIES:

- Planning the project of the migration for infrastructures of different sizes and processing the project to succeed in any type of migration.

- Gathering requirements from the various sources and customer's experts to get a comprehensive list of objects that need to be migrated.

- Providing architecture sessions with experts (from the customer and vendors' sides) to achieve best-optimized architecture based on Cloud Adoption Framework for Azure.

- Creating comprehensive architecture documentation.

- Creating scripts and other opportunities to automate part of the migration process to optimize the timeline and other resources in the project.

- Creating/modifying the Azure infrastructure based on the confirmed architecture.

- Migration of on-premises Windows and Linux VM to Azure VMs.

- Control/support/migration of objects to the Azure infrastructure in conjunction with customer's expert teams.

- Consultancy on the future optimization in the Azure infrastructure within or after the migration process.

Note: the estimated price covers up to 10 virtual machines.

Our Data Center IaaS Migration: 4-Week Implementation is available Globally

CUSTOMER STORY

Datacenter migration to Microsoft Azure for Metinvest Group – the world's Top-50 steel and Top-10 mining company.
