Microsoft Teams and Viva: 2-Month Implementation

infopulse
Part of TietoEVRY Group

$ Price: from $10,000, depending on the requirements

L Duration: 2 months

Set up a digital workplace through the Microsoft Teams and Microsoft Viva platforms to create a collaboration hub for employees, accessed from anywhere. As an Azure Expert MSP with 6 Advanced Specializations, Infopulse will help you create a custom digital workplace solution tailored to your business needs.

What makes Infopulse different is that we use the most applicable and advantageous implementation scenarios that match your business objectives. Enhanced agility, automated administration, lower costs, less complexity, and higher availability – you get all this when our experts manage the implementation of Microsoft Teams and Viva solutions.

The digital workplace has become a modern tool of the hybrid work model that allows employees to collaborate with peers from any place and device. The first employee experience platform Microsoft Viva, delivered through Microsoft Teams and integrated with Microsoft 365 services, helps to improve employee overall experience and productivity, standardize learning management systems and unify them in one place. Set up an organization-wide collaboration hub for efficient remote work and professional development.

AGENDA

Because each organization has a unique set of requirements and tools that need to be implemented in the digital workplace, we approach each client individually. Infopulse offers a full range of Microsoft Teams and Viva implementation services, from initial assessment and consultation to development and support.

KEY BENEFITS

- Boosted collaboration and productivity
- Amplified digital transformation
- Easy access to information from anywhere
- Data-driven insights on performance
- Advanced security and protected data

DELIVERABLES

- Analysis of business requirements
- Best scenario recommendation based on current needs
- Security system and identity management assessment
- Access control system set up and customization
- Custom software development (including a scenario with a Power Apps application embedded in Microsoft Teams)
