

SAP to Azure Migration Readiness: 1-DAY ASSESSMENT

Price: For free

Duration: 1 Day

The following 1-Day assessment will help you identify business drivers and challenges of SAP migration to Azure, gather all necessary requirements and create a suitable migration strategy, and accurate execution plan.

After the assessment, you will know how to build a PoC for migrating your on-premise SAP landscape to Microsoft Azure platform.

AGENDA

SAP Assessment

At this stage, we thoroughly study your existing SAP environment by gathering information and analyzing whether your SAP systems are ready for the migration to Azure. We deliver a detailed presentation or report with the assessment results.

- Defining sufficient compute resources for SAP workloads
- Storage provisioning, storage allocation and performance
- Determining network bandwidth and hybrid connection
- Defining appropriate OS, SAP Apps and DB version
- Specifying Backup and DR policies
- Overview of monitoring requirements

Migration plan & roadmap presentation

- Developing architecture overview
- Migration options, roadmap and recommendations
- Azure consumption estimation

Deliverables

- Architecture vision
- MS Azure cost estimation
- Migration roadmap
- Remediation checklist
