infopulse

SAP to Azure Migration:
1-DAY WORKSHOP

Price: 3000$ **Duration:** 1 Day

The following SAP on Azure workshop is designed by Infopulse, a certified SAP Partner and Microsoft Cloud Solution Provider. This in-depth workshop covers best practices for architecting, developing and managing SAP services and applications in Azure. In the end, you will understand how PoC development can benefit your business.

Prerequisites
A good level of architectural knowledge in SAP Basis and Azure services.

Audience
Cloud Architects and IT Professionals who have architectural expertise in infrastructure and solutions design in cloud, as well as SAP Basis experience.

What You'll Learn
- The advantages of using Microsoft Cloud Platform, benefits of utilizing SAP on Azure
- Practical recommendations on how to properly migrate SAP systems to the Azure cloud
- The best ways to build SAP landscape on Microsoft Cloud Platform
- How to deploy complex infrastructure solutions to Azure for SAP systems landscape

AGENDA

Module 1: Introduction to SAP on Azure
- General overview of the Microsoft Azure platform
- Why it's worth migrating SAP workloads to Azure
- Common usage scenarios
- Advantages of SAP on Azure

Module 2: SAP on Azure Architecture
- Methods for implementing SAP on Azure architecture
- SAP to Azure migration scenarios
- Microsoft Azure licensing for SAP systems
- Demo example based on the experience of Infopulse

Module 3: Leveraging Azure Cloud Capabilities to build SAP landscape
- Types of Azure subscriptions
- Overview of hybrid network scenarios
- Virtual machines for SAP
- Storage
- Methods for ensuring IT security
- Monitoring
- Services that help optimize Azure usage with SAP landscape
- Backup and Disaster Recovery provisioning

Module 4: Practical workshop
- Planning and deployment of SAP on Azure solution
- SAP on Azure installation using a tech demo provided by Infopulse

Deliverables
- Best practices for implementing SAP on Azure
- Recommendations for the migration scenarios of your SAP solutions
- Vision of possible next PoC
