

Informatika AD – A reliable partner for ICT solutions

Informatika a.d. Belgrade is the leading, as well as the oldest IT company currently operating in the West Balkans, established back in 1976.

With a team of over 150 specialists covering all segments of ICT industry, Informatika provides its users with ideal solutions in the fields of computer and communication infrastructure, industrial process automation and integrated business process computer management.

Informatika a.d. has maintained long-term partnerships with many major global IT companies, such as: Microsoft, Dell, Huawei, Unisys, Lenovo, Fujitsu, Symantec, CA, VMware, RedHat, Cisco, Siemens, Printronix, Lexmark and Xerox.

During the period of its existence, which is over forty years now, Informatika has become a reliable partner to over a thousand companies from Serbia, North Macedonia, Bosnia and Herzegovina, Romania, Russia etc.

We design, manufacture, automate, implement, represent, educate, maintain, and integrate. From industrial processes monitoring and control, to providing managers with business-critical information.

Our Advantages on the Serbian Market - Over 40 years of experience in IT

Having employees who have been working on the local market for more than 20 years certainly helps us in terms of experience and market knowledge. With constant market research, we try to anticipate future trends in customer preferences.

Our flexibility and adaptability in meeting changing market needs is the key to the success of our strategy for the future.
