

# Infosys A<sup>3</sup> Framework for Industry Clouds

Engage with customers to deliver the best of the Microsoft Industry Clouds

The A<sup>3</sup> for Industry Clouds is a consulting framework developed by Infosys as a GSI, to enable clients in their transformative journey to Microsoft Industry Clouds.

A<sup>3</sup> is a framework encompassing ADVISE, ADOPT and AMPLIFY processes to help clients leverage the Industry Cloud offerings to their full potential, with the right components based on their business objectives with the ability to unlock possibilities for greater outcomes.

- A structured approach that helps clients in assessing where they are w.r.t their vision, tech landscape, and transformation requirements.
- How to use the Industry Cloud/s as an enabler to get there!
- Every Industry Cloud needs to be deployed, tailored to the client needs and enhanced. This is what the framework enables!
- We offer pre-built tools & templates for each Industry Cloud & Domain

## ADVISE

- **Unearth value creation possibilities**
- **Envision the future state** with industry cloud
- **Realize more value** out of the Industry Cloud/s.

## ADOPT

- **Detailed discovery** with respect to industry cloud capabilities
- **Facilitate the implementation**
- **Enable** last mile configuration
- **Fast track user adoption**

## AMPLIFY

- **Enhance** the Industry Cloud for deploying complementary solutions.
- **Contextualize** business solutions.
- **Deliver value** through application and modernization

**This is executed as a modular program, based on what each client needs. It can include the end-to-end pillars of the framework or be executed as independent components.**
