

Infosys Source To Contract Solution

Infosys[®]
Navigate your next

Infosys Source To Contract is one of the most comprehensive, advanced, and agile contract management solution for enterprises.

Challenges

- Lack of efficient workflow to review and approve contracts.
- Single workbench to collaborate during contract creation process is not available.
- Expensive software to create contracts

Ideal Solution

- Easy to use UI with automated workflows
- Integrated with MS Teams for enhanced collaboration
- Built on Low Code App Platform with Lower Cost implementation cost and ease of customization
- Flexible to integrate with master data and contract execution platforms

Desired Outcomes

- Customized approval workflow
- Cockpit view of different stages of contract creation
- Supports integration with master data and ERP
- Real time notifications
- Complete audit logs
- Allows contract amendments
- Compatible to use from mobile and desktop
