

Infosys SAP S/4HANA – On-Time Delivery Prediction

Use Case

Business Overview

Across sectors, CPG companies today face daunting strategic and operational challenges. An efficient shipments model is imperative to provide a cutting edge cost optimized logistics chain to drive growth.

With expectations of higher on-shelf availability and lower inventory costs, the pressure on delivery performance has intensified. Retailers want to maintain 'digital' shelves stocked as and when needed, without any delay or wait-time. Thus, they allow narrow delivery windows to the shippers. Leading players have started imposing financial penalties to suppliers for late deliveries.

“One of our CPG Clients’, who is also industry leader, had to pay 5M USD penalty for not On-Time Shipments.”

Did you Know?

80%

Of CPG Companies consider shipments as their biggest Obstacle

60%

Of Companies fail to meet the Delivery Target Window

83%

Of Supply Chain Leaders rank logistics as their top concern

Current Scenario

Despite the Industry Demand, there is a glaring gap in any solution providing Predictive OTD

Lack of Prediction Solution at Market Place

By the time Logistics Managers come to know of an upcoming delay, its too late to react

No Reaction Time

In Traditional supply chains there is no scope to re-orient supply chain assets to cater to customer's need in real time or near real time.

No flexibility in Current Model

Reasons for Late Deliveries

1 - Supplier Caused Delay

- Lack of Goods in Inventory to be delivered
- Congestion at point of loading

2 - Carrier Caused Delay

- Traffic
- Bad Weather
- Shortage of space in Container
- Lack of proper coordination of Freights

3 - Receiving Stage Delay

- Congestion at the point of unloading goods
- Lack of Coordination between Customer central team and Warehouse Management Team

Infosys Solution

Solution Components

 Leverages Digital technologies to optimize supply chain

 Leverages Digital technologies to optimize supply chain

 This Solution Predicts possibility of late/early vs On-time delivery at time of shipment creation

 **Real Time root cause Analysis:**
Based on real time data, identify possibilities of delay and their Cause

 **Real Time root cause Analysis:**
Based on real time data, identify possibilities of delay and their Cause

 Accelerated and Proactive Decisions/Actions

Business Benefits

On-Time Delivery Score

With this Solution, Client is able to improve OTD SCORE by 5%

First Day Shipments

Client is expecting to bring upto 20% improvement in DAY 1 Shipments

Accuracy

This Solution is able to predict on time vs late/early deliveries with **80% accuracy**

Win Battle of Financial Penalties

This has helped various CPG Clients to avoid financial Penalties due to late delivery.

A series of vertical blue bars of varying heights, some reaching the top and some reaching the bottom of the page, creating a decorative border.
