

iDeras

NETWORK SECURITY

iDeras UNIFIED THREAT MANAGEMENT SYSTEM – UTM

The iDeras UTM Series is optimized for performance and reliability at 1 Gbps with very flexible deployment options. For perimeter protection, the solutions can be deployed in front of or behind a router/firewall to immediately protect the network and applications from inbound threats.

Unified threat management (UTM) was introduced as a new approach to security management that integrates various security technologies.

Advanced features:

iDeras comes along with a set of advance features which add some fundamental functionality and flexibility to the UTM. These features include,

- ❖ NAT
- ❖ Load Balancer
- ❖ CARP Failover
- ❖ DHCP addressing
- ❖ DNS resolution
- ❖ Dynamic DNS
- ❖ SNMP
- ❖ Logging & Monitoring
- ❖ Administration & System Management
- ❖ Online Reporting
- ❖ Packet Capturing
