Unlocking Security Excellence with Microsoft Copilot for Security

Microsoft Copilot for Security Workshop

Prepare for the arrival of Microsoft's Copilot for Security and discover how generative AI can fortify your organization's IT defenses.

The escalating speed, scale, and sophistication of cyberattacks necessitate a reevaluation of traditional security tools. Enter Microsoft's Copilot for Security, a cutting-edge generative AI solution built upon the bedrock of Zero Trust principles. By adopting this technology, your organization gains a competitive edge in the ever-evolving digital threat landscape, tipping the scales in favor of your security team.

Skaylink will showcase the value of Microsoft Copilot for Security and demonstrate the Art of Possible how it can evolve your security posture while reducing your workload. Our team of experts will address every aspect you need to know – from implementation to effective prompting.

Key Features

- **Integration:** seamless integration with products in the Microsoft Security portfolio such as Microsoft Defender XDR, Microsoft Sentinel, Microsoft Intune and third-party services.
- **Plugins:** Use of security-specific plugins that leverage organization-specific information, authoritative sources and global threat intelligence to respond to user requests.
- **Generative AI:** Leverages the full power of the OpenAI architecture to respond to user requests with customized insights and guide next steps.

Components of the Workshop

Here's what to expect in two three-hour sessions:

1. **Introduction to Microsoft Copilot for Security:**
   - Gain a holistic understanding of Copilot and its alignment with organizational needs
   - Learn practical integration methods with existing Microsoft 365 Defender products
2. **Understanding different Personas:**
   - Explore how various roles, including CISOs, SOC analysts, and end users can effectively leverage Copilot
3. **Hands-on activities – Security Prompts:**
   - Learn to set up a practical prompt book for the organization
   - Design engaging security awareness campaigns using visuals, humor and concise text

Why Skaylink?

- More than 25 years of experience
- On-Premises, Hybrid and in the Cloud
- Microsoft certified experts
- Microsoft Cloud Partner from the very beginning
- First FastTrack partner in Germany
