Ingrity – Intelligent Document Search Engine
Solution Name

Solution Introduction

AI-Driven Intelligent Document Search Engine powered by Azure OpenAI.

- Integrate seamlessly with existing platforms, including Teams, SharePoint, and OneDrive, eliminating the need for additional logins or interface changes.
- The deployment was executed with zero disruption to users, ensuring that existing access permissions, security protocols, and document structures remained intact while enabling instant information retrieval through natural language queries.
- A scalable, user-friendly solution that enhances efficiency, supports faster decision-making, and provides a competitive edge by optimizing document search and management.

Customer case

Customer's Challenges (Solved)

- ✓ **Time-Consuming:** Employees spent hours manually searching through documents, time that could otherwise be dedicated to strategic tasks.
- ✓ **Inaccurate and Error-Prone:** The manual search process often led to missed or incorrect information, increasing the risk of costly mistakes.
- ✓ **Employee Frustration:** The tedious process of sifting through unstructured data in PDFs led to frustration and reduced overall productivity.
