TASKS

**Management Systems**
+ Energy
+ Environment
+ Climate

Technical Management
+ Plant Management
+ System Sizing

Additional Billing
+ Incoming Invoices
+ Cost Controlling
+ Purchasing
+ Further Invoicing

Fulfilment of External Requirements
+ Reporting Obligations (e.g. GHG Balance)
+ Energy Audits
+ Subsidies, Grants, Reductions
+ Certification

Customisability
+ Scalability
+ Multi-level multi-client Capability
+ Branding
+ White Label

Monitoring
+ AI for recognising Anomalies
+ Multidimensionale Regression

ingsoft InterWatt

Software for Digitalising all Energy, Climate and Environmental Processes

Cloud or On Premises

Accounting
+ Invoice Verification
+ Service Charge Billing
+ Budgeting & Forecasting Module

Reporting
+ Automated Report Dispatch
+ Customisable Analyses
+ Key Figure Editor

RECORDING

Automatic Data Acquisition
+ MQTT / LoRA / BacNet / OPC UA / ...
+ Control Technology, Field Devices, Data Loggers

Suppliers
+ Invoices / Quantities (e.g. Energy Supplier, Waste Disposal Company)

Internal systems
+ ERP
+ MES
+ Databases

Manual Data Acquisition
+ App (OCR), Web
+ Media & Material Flows
+ Influencing Variables (e.g. Weather Conditions)

Suitable for

+ Consumption, Production and Supply of Energy (Solid, Liquid & Gaseous Fuels; Heating & Cooling; Electricity) + Mapping of Emissions in Scope 1, 2 & 3
+ Procurement of Raw Materials and Goods (including Water) + Waste and Wastewater + Services and Production
