

Are you **struggling to manage staff transportation** effectively in your day-today business operations?

Transpomate is here to revolutionize your transport operations and simplify your hassles!

Our user – friendly interface comes with **KEY FEATURES** such as:

Additional VEHICLE MANAGEMENT FEATURES:

- Fleet Capacity Management**
- Insurance Renewal Notifications**
- Revenue License Renewal Notifications**
- Vehicle Service Notifications**
- Tyre Change Notifications**
- Periodic Fitness Certification Notifications**
- Speed Limit Notifications**

How does this work?

Step 01

Initiate trip request

A staff formally requests approval for a trip

Step 02

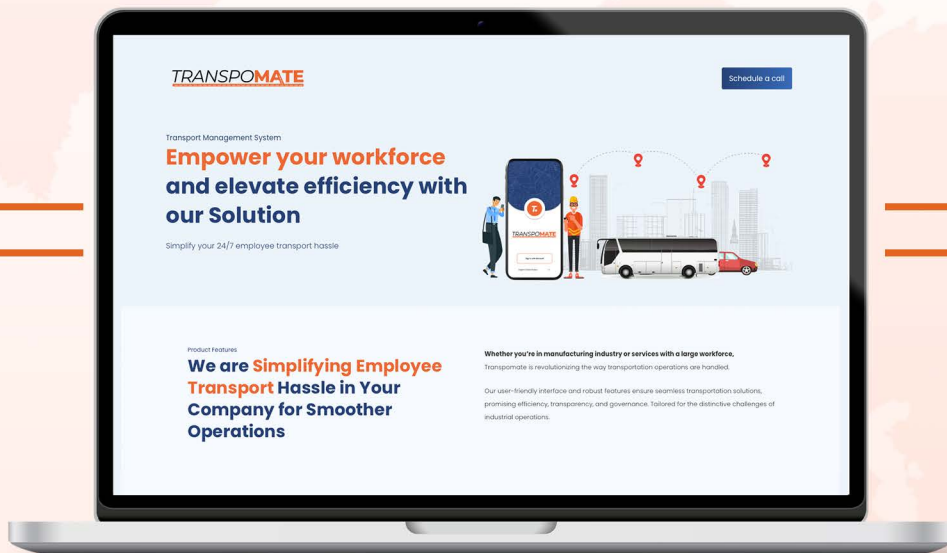

Trip Authorization

Following the submission of a trip request, the manager reviews and either approves or rejects the request

Step 03

Trip Coordination

Upon approval, the approved trips are handed over to the Transport Coordinator (Human or Bot), responsible for organizing and coordinating the necessary arrangements

Step 04

Notification Dispatch

Once the trip logistics are finalized, notifications containing relevant trip details are dispatched to both the assigned driver and the passenger

Step 05

Reporting & Accessibility

Upon trip confirmation, all relevant trip information become accessible to finance & HR for decision-making purposes

Streamline your employee transport management system today with Transpomate!
