What is Power BI?

Power BI is a business analytics solution that lets you *visualize your data* and share insights across your organization, or embed them in your app or website. Connect to *hundreds of data* sources and bring your data to life with live dashboards and reports. It also helps to keep the report *synchronized* with updated data.

Why Power BI?

Create

Connect to your data wherever it lives. Than explore your data with stunning interactive visualizations.

Collaborate and share

Publish reports and dashboards, collaborate with your team, and share insights inside and outside of your organization.

Access insights from anywhere

Take action with seamless access to insights from your desk or while on the go with Power BI apps built by Microsoft, our partners and your organization.

Who uses Power BI?

Microsoft Power BI is used by *both department representatives and management*, with reports and forecasts created to aid the company's representatives, while also providing data for management on how the data are progressing toward their goals.

In addition, Power BI offers an admin portal for administrators to help configure the implementation of Power BI, as well as usage monitoring and licenses.

Why Us?

We transfigure disordered and untidy data to visually interactive story which helps user to access the information which is effective, crystal clear and critical for his/her designation.

Our Competencies:

High Performance

Prepare the best optimized Tabular Models with BIDS or Power Pivot.

Prognosis & Forecast
