Microsoft Dynamics 365 Business Central Learn about the system and implementation steps

Training | INLOGICA
Training Objective:

Regardless of your company's size, the complexity of your business scenarios, and the level of competence of your team, implementing Microsoft Dynamics 365 Business Central ERP represents a significant organizational and financial challenge. The training aims to provide key information on how to carry out this type of project.

The training is for companies that:

- The implementation of the Microsoft Dynamics 365 Business Central platform has been approved.
- Wish to change the ERP system in their company.
- We are considering the practicalities of the implementation process and possible difficulties in preparing for it properly.
- They are considering implementing Microsoft Dynamics Business 365 Central but have not yet determined whether it is the right system for their company.
- We are using Navision (NAV 2016, NAV 2017, NAV 2018) and planning to migrate to a more modern ERP system.

The training is aimed at:

- Owners and Board Members.
- Managers of key areas (IT, finance, production, logistics).

After the training, you will know the following:

- About the principles of Microsoft Dynamics 365 Business Central.
- About the key aspects of licensing the Microsoft Dynamics 365 Business Central platform.
- About the structures of the Microsoft business tools ecosystem.
- What are the implementation methodologies in IT projects.
- How to effectively organize and manage a project.
- About project budget management techniques.
- What a typical daily workflow with Microsoft Dynamics 365 Business Central looks like.
