

Microsoft Dynamics 365 is cool!

Learn how to improve your company's system speed.

Training | INLOGICA

Training Objective:

The Microsoft Dynamics 365 ERP system is a framework that multidimensionally supports organizational processes. As the volume of data handled increases, the functionality tree expands, the number of users grows, etc., there can be challenges with the performance of this tool. In this training, we will show you how to manage the user, modifications, and database so that the system runs smoothly and provides your team and company with the best support.

The training is for companies that:

- Are working on one of the older versions of Microsoft Dynamics 365 (AX2012, 2009, 4),
- Are working on a version of Microsoft Dynamics 365,
- Have diagnosed a slowdown in system performance,
- Have observed increased process execution time in the system,
- Receive reports from employees regarding system performance issues.

The training is aimed at:

- IT managers and employees
- Consultants and programmers

After the training, you will know the following:

- What is the architecture of the Microsoft Dynamics 365 system,
- What are the most common causes of slow system operation,
- With what tools to look for the causes of slow performance,
- How to perform analysis for system performance

AGENDA

1. INTRODUCTION

- The architecture of Microsoft Dynamics 365.
- Working with data.

2. MOST COMMON DIFFICULTIES – DISCUSSION

- Databases.
- Scalability.
- Code quality,
- Hardware.

3. TOOLS AND THEIR USE - WORKING WITH THE SYSTEM

- SQL Server Management Studio.
- Trace Parser.
- Microsoft Dynamics 365 AX Debugger.
- SQL tracing in AX.

4. EXAMPLES OF DEFECTS - WORKING WITH SYSTEM

- Indexing.
- Inadequately constructed database query.
- Excessive amount of data.

5. TIME TO REMOVE CONSTRAINTS

- Analysis of a selected problem in your system using the tools shown in the training.
- Prepare a summary in the form of a recommendation or solution to the problem.

Number of participants:

10

Duration:

1 day (8h)
