Logistics and Warehouse in Microsoft Dynamics 365

Training | INLOGICA Training Objective:

Optimal support and automation of inventory handling, warehousing and material sourcing, and logistics in supply chains are key tasks for companies involved in distribution and manufacturing. The training is designed to provide the most relevant information on handling areas related to logistics and warehousing in Microsoft Dynamics 365 ERP.

The training is for companies that:

- Have decided to implement the Microsoft Dynamics 365 platform.
- Want to implement Microsoft Dynamics 365 but do not yet know whether this system is suitable for their organization in terms of handling logistics and warehouses.
- Are working on one of the older versions of Microsoft Dynamics 365 (AX2012, 2009, 4) and are considering moving to the latest version of Microsoft Dynamics 365.
- Are working with Microsoft Dynamics 365 and want to increase work efficiency or bring in new team members related to logistics and warehousing.

The training is aimed at:

- Owners and Board Members.
- Managers of key teams related to logistics and warehousing.
- Logisticians, planners, warehouse workers, production team leaders.

After the training, you will know the following:

- How modules related to the logistics area work in Microsoft Dynamics 365.
- How to add and release products.
- How inventory management works.
- How to handle product purchases and sales.
- How to replenish inventory and plan demand.
- How to create loads and plan shipments.
- About the basics of an embedded warehouse management system (WMS).
- How to set up and use a mobile app for warehouse management.

AGENDA

1. INTRODUCTION

- System structure.
- Menu. Searching and filtering data.
- Personalization of settings.

2. PRODUCT INFORMATION MANAGEMENT

- Module parameters.
- Primary products, released products, product dimensions.
- Creating products manually or using the wizard.
- Default order types.
- Inventory valuation methods.

3. INVENTORY MANAGEMENT

- Module parameters.
- Stock sheets and transfer orders.
