

InMobi Telco Cloud Proposal

2021

InMobi is one of the largest Media Monetization networks globally

Live ~1.5Bn active unique users

- Established in 2007
- India's first start-up Unicorn
- **23** offices Globally with approx. **1200+** employees.
- Key Investors:
 - **Softbank (2011) Sherpalo, KPC, UC-RNT Fund.**
 - **Google** took strategic equity in December 2020

Key telco & OEM Implementations

Uniquely governed for Telcos

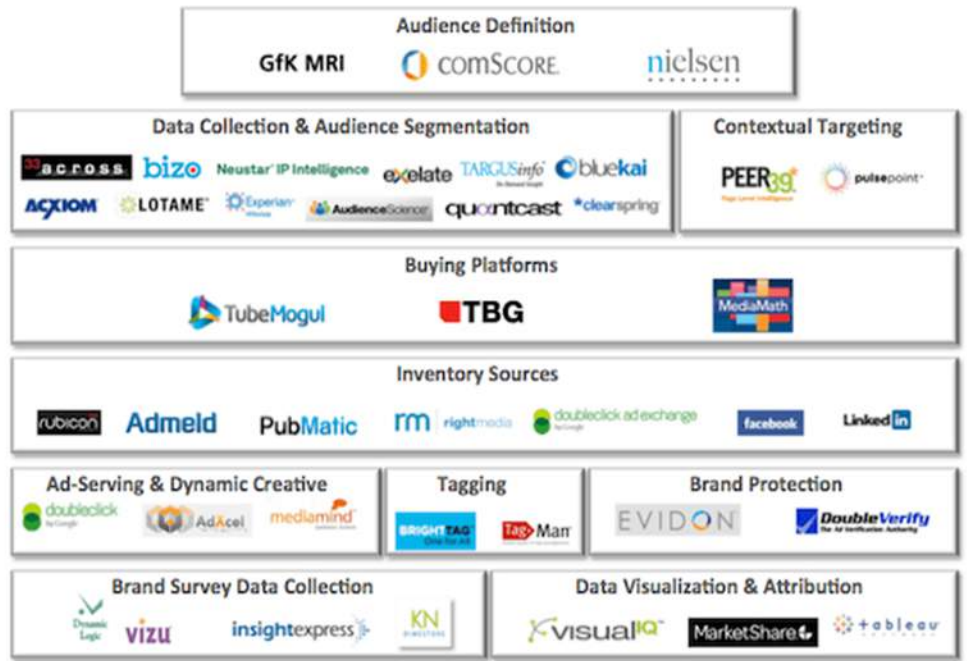

- **100% success rate** on monthly Govt Regulatory Audits
- Established **16 US Covered Data Systems** per DOJ Regulatory policy
- Deep OEM relationships (**already live on 700+ Device SKUs** across *Samsung, LG, Moto, Huawei, Xiaomi, Nokia, Oppo, Vivo* etc)

Massively simplified operations 'without' margin leakages

Co-built & Co-sold with

Traditional Ad-Tech buying model (fragmentation & cost leakages)

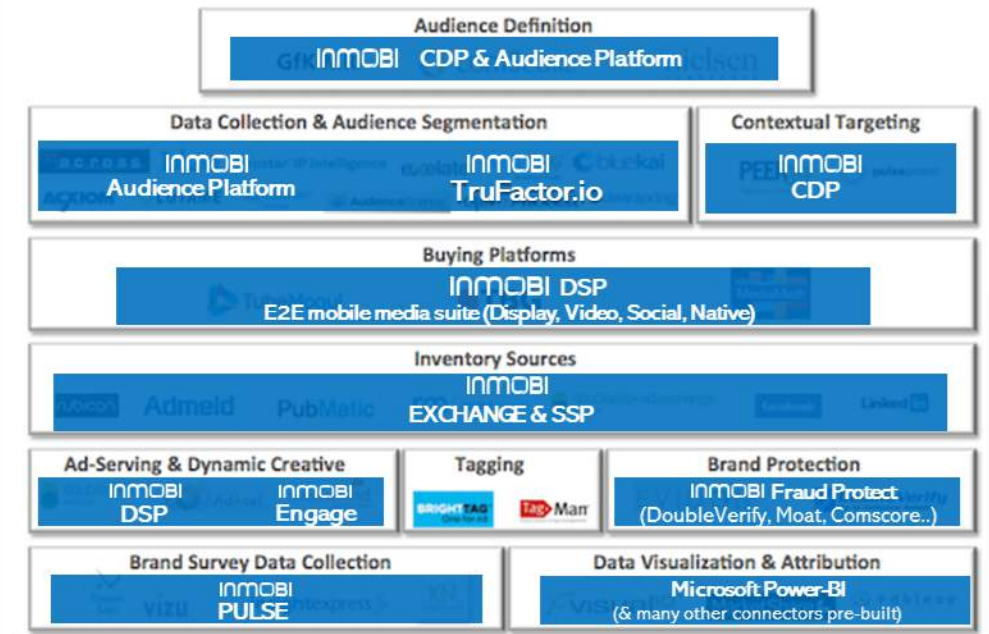

- × 20+ vendors
- × Cost is 'sum' of parts (cannot bulk discount)
- × Built on different underlying clouds

massive
simplification

InMobi's E2E Mobile media suite

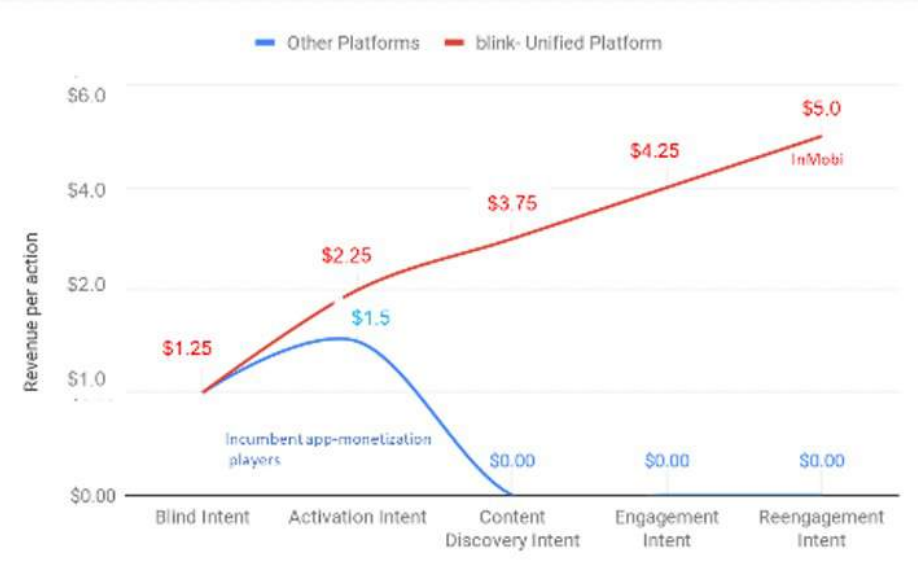

(e2e pre-stitched – reaching 1.6 Bn+ users live today)

- ✓ Massive cost advantages for ETISALAT (margin saving by using one vendor for e2e buying)
- ✓ No 3rd party cost leakages (like traditional location-based vendors who sub-contract media buying externally)

Carrier becomes the **GATEWAY** to *everything* 'internet commerce'

Revenue opportunity - InMobi vs Others small players

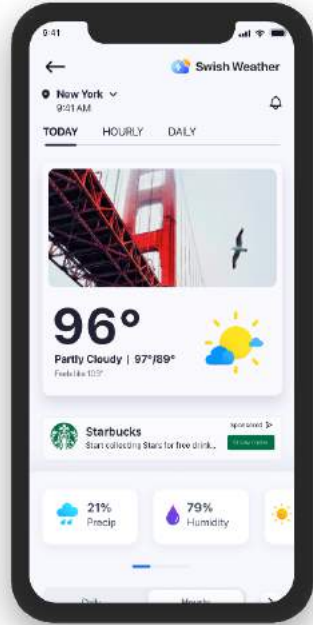

Telco can now make revenue-share on all app-commerce dollars on the

Recurring Revenue (\$) paid by InMobi to Telco every month

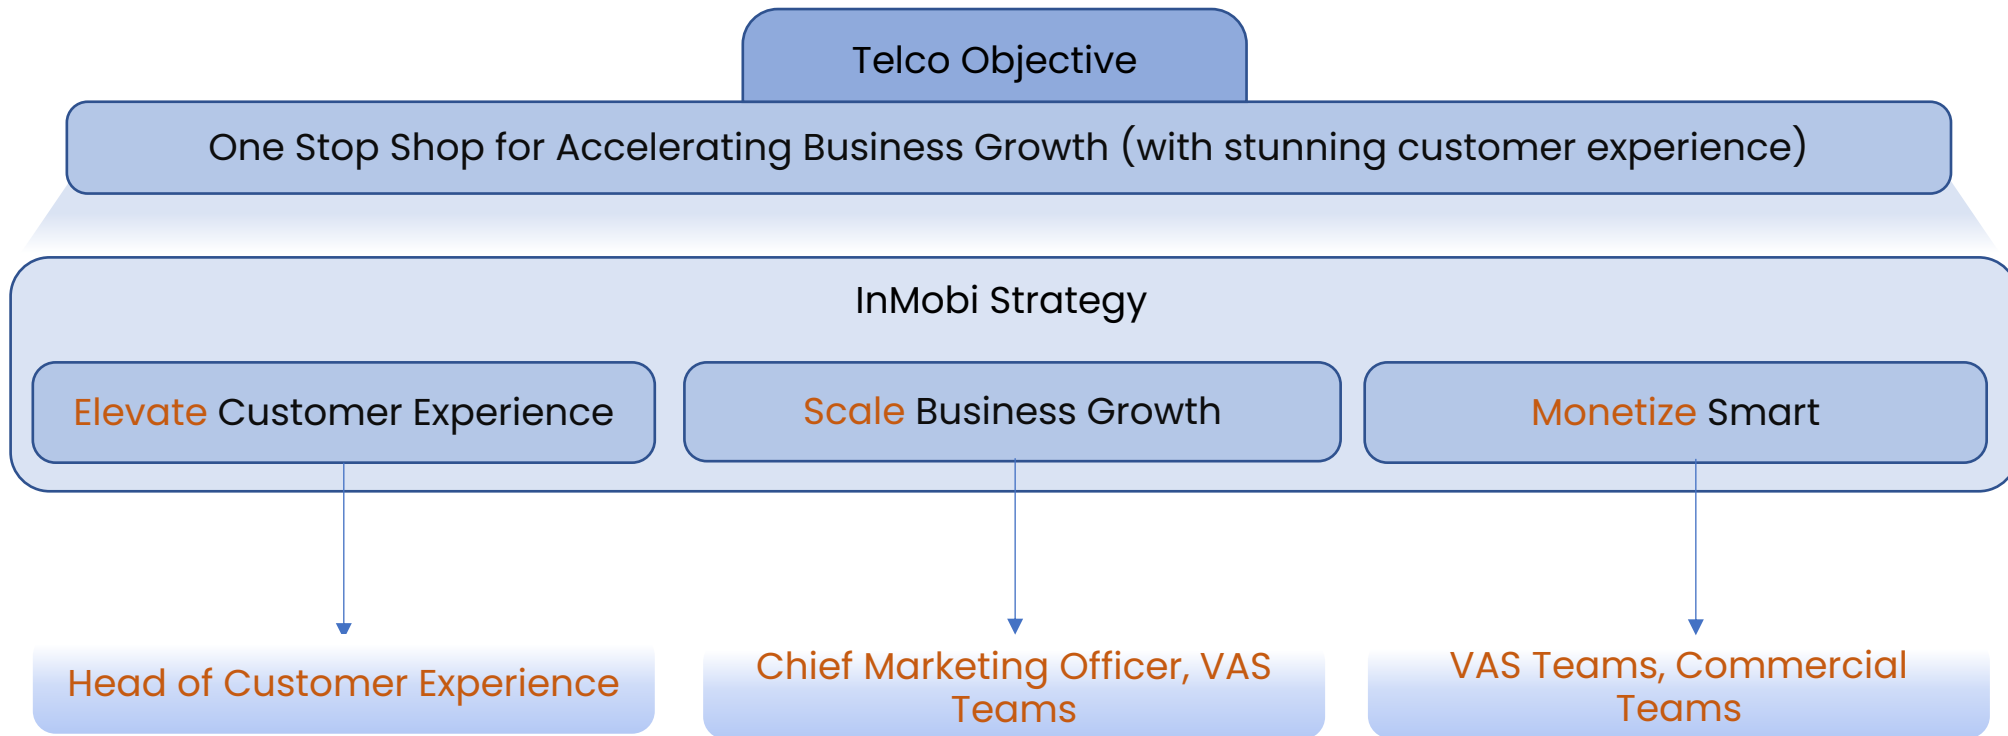

Over 35,000+ premium global content, commerce & merchant companies – pre-connected at InMobi

Scale of the Products
340 Mn +
Lifetime Users

Building blocks for InMobi Telco Strategy

InMobi comes with deep understanding of Telco landscape and so serves best as the one stop shop for accelerating business growth for Telcos. InMobi has a laser sharp definition of how to cater to Telco challenges through three strategic levers of Success: **Elevate, Scale, Monetize**.

Smart folders & contextual discovery of relevant apps

Smart folders & contextual discovery

dynamic folders, allows re-engagement

Dynamic folders

A dynamic folder also allows the users to discover various content bits / offerings from apps within the folder.

Through API integrations with various App providers, we can drive high intent clicks within the App and thus provide a surface area for the App owners to drive high intention clicks even before the user has opened the app but has shown intent to open the Shopping folder in this case.

InMobi Integrated Search : Native to App Tray & drives better discovery

InMobi Experience

Real-Time

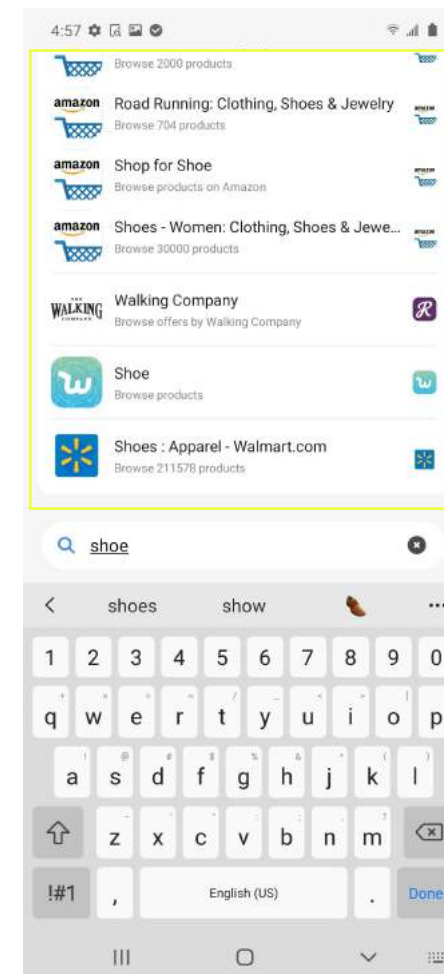

Submitted

Competition

VS

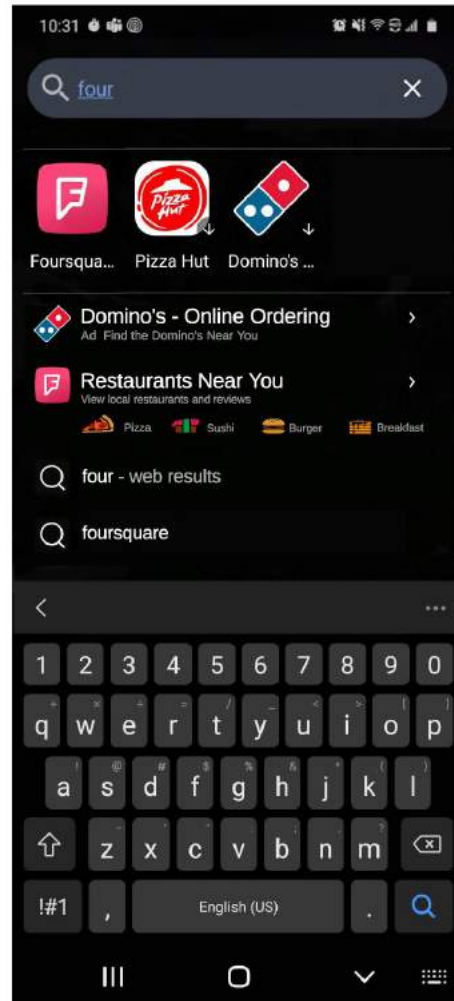

- ✓ Familiar to user - Enables fast navigation without information overload
- ✓ Doesn't introduce friction to today's common use (app navigation)
- ✓ Affords much greater breadth when user submits search to find most relevant category, app, and listing

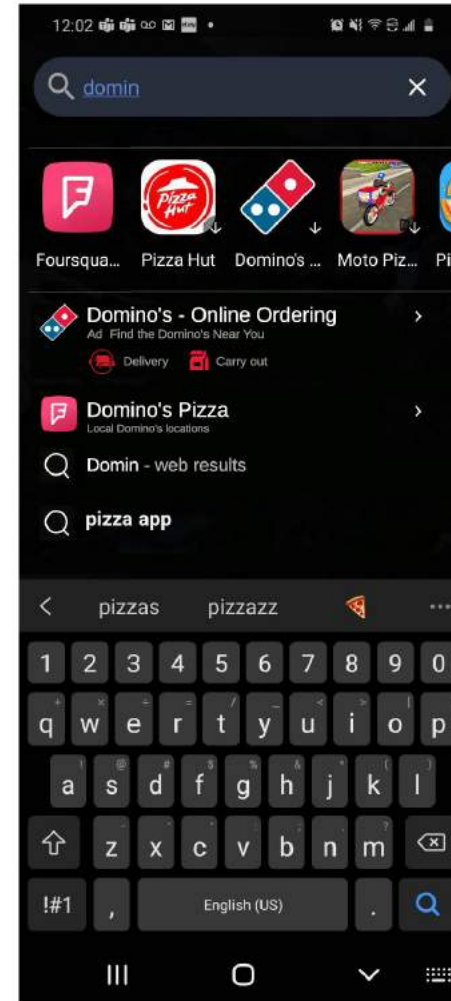

- ✓ Heavily indexed on deeplink results - Adds navigation costs to user engagement
- ✓ Appears non-native to app tray UI - Requires context switch as users navigate across search & app tray usage

App deep links on real time search

Category Deep-links: Meal & Food Type

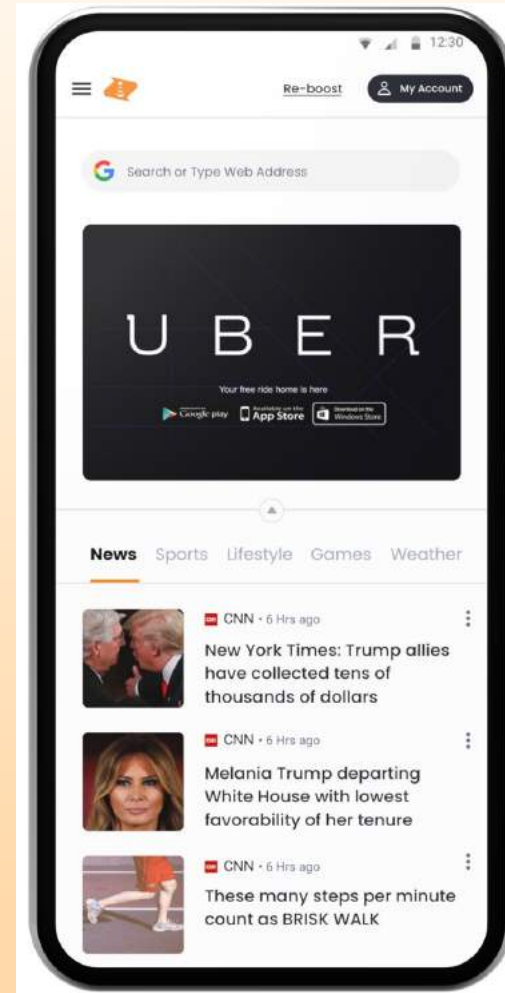

Utility Deep-links: Delivery Pref. & Store Location

- ✓ Full keyword submission results will have up to 4 app shortcuts (based on relevance)
- ✓ We can light up a dedicated module to surface shortcuts (deep-links)

Browser Home page

Default Browser

Home page

InMobi monetizes the default screen in the native browser (OEM Browser or Chrome browser).

The consumer value propositions involves a mix of Quick access links and News & Entertainment stories which have mass appeal.

We monetize this reach for a Telco and cut them a check.
