INNOFACTOR®

STEP | Pilot Factory

For whom ?

The offer is aimed at Business owners, typically within Business Development or IT who wants to build internal engagement and the business case within Microsoft's Power Platform, low-code and process automation offering.

How is it delivered?

Pilot Factory is part of Innofactor's Power Platform STEP framework and is created to accelerate low-code and process automation adoption during the discovery phase. It's an established process and accelerated delivery to generate a Proof-of-concept within given business domain and prioritized use-cases. The process consists of initialization, ideation, prioritization, design, handover and future state planning activities (see visual representation on the next page).

*Final service format and pricing may vary to secure a solution that is tailored to best meet customer demand.

What is the expected result?

Low-code and process automation practices tends to seek cross organizational business value in

- **Accelerating digital innovation**
- **Increase responsiveness to Business demands**
- **Reduce the need for complex IT-hiring**
- **Empowering citizen developers to optimize business processes**

Pilot Factory helps organizations to build internal mandate by creating understanding, awareness, tangible evidence and basis for decision. This in the form of a Proof-of-concept, solution road map and cost estimates for realization. Allowing organizations to accelerate the internal adoption within early stages of discovery of the low-code and process automation opportunity.
