

Microsoft Copilot Readiness Kit

Get ready for arrival of Microsoft 365 Copilot. 3-week program that helps to keep your business data secure and adhere to document privacy requirements.

Enabling Business Transformation

Copilot Readiness Kit

IDC: “Understand the security, confidentiality, privacy, and quality implications of generative AI technologies and plan implementations accordingly.”

Innofactor Copilot Readiness Kit helps to mitigate the risks

The Innofactor Copilot Readiness Kit serves as a valuable resource in mitigating risks associated with the use of Microsoft Copilot. While Copilot is designed to safeguard tenant, group, and individual data, concerns regarding data leakage still exist. One of the key challenges organizations encounter is effectively managing and safeguarding private, personal, and confidential data within Copilot responses. It is crucial to avoid the inadvertent sharing of confidential information. Therefore, we offer Copilot Readiness Kit to help that Copilot effectively protects sensitive business information and data.

Key questions

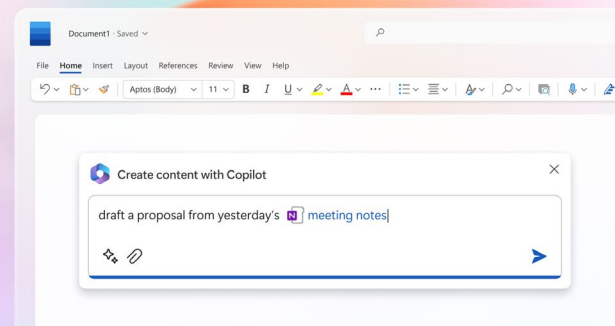

- How to identify wrongly classified data?
 - Personal ID, passport numbers, bank account and CC numbers, etc.
- How to identify sensitive data and restrict access to it?
- How to prevent wrongly classified documents to become part of Copilot’s user context?
- How to avoid oversharing of confidential data?

55%

of large EMEA organizations explore AI potential use cases.

31%

of executives identified data-related challenges among the top three concerns hampering their company’s AI initiatives.
(Deloitte, 2023)
