**Strong Microsoft
competencies &
support**

Innofactor's MDR as-a-service enables an effective, real time, rapid, and formalized response to security incidents found in various Customer environments

Innofactor Managed Detection and Response

Rapid & light deployment

Service core infrastructure resides in Customer's own Azure cloud and requires no OPS, which supports rapid and light deployments compared to legacy services.

Affordable pricing

€

Typically, half the cost of traditional CSOC services: MDR & CSOC services have been traditionally available to enterprises and large companies only due to high expenses. Innofactor MDR changes this by introducing lower price with lighter deployment due to lack of need to set up on-premise infrastructure. This makes the service affordable to different business sizes.

Industry-leading scalable security technology

Azure Sentinel

Innofactor MDR utilizes industry-leading technologies with Microsoft Sentinel SIEM which Forrester Research named as a "Leader" in The Forrester Wave™: Security Analytics Platform Providers, Q4 2020.

Strong Microsoft competence & support
