

# Planner & Project Implementation

Innovative-e transforms work and project management into a competitive advantage with a cloud-based, modern collaboration toolset that engages everyone in your core objectives.

Our team comprehensively evaluates the three most critical elements – people, processes, and technology- at stake in your organization.

Public cloud-based Collaborative Work Management (CWM), and Enterprise Work Management (EWM) solutions provide the fastest possible deployment time at the lowest initial investment levels. Microsoft CWM & EWM technologies are flexible cloud solution framework for advanced and everyday work.

## Project Objectives

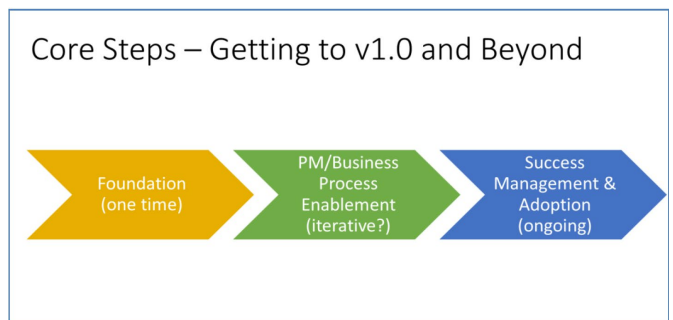

The overall objectives for this engagement are to:

1. Facilitate a full understanding on the part of IEC of current processes, needs and challenges to empower IEC with the knowledge and context from which to design an end state solution
2. Install foundational components of the end state solution
3. Effectively configure the solution to meet the specific requirements.
4. Train the user community and administrators in the solution
5. Deploy the solution in a production environment
6. Put in place a managed services contract for ongoing changes and support

## Our Approach

Innovative-e (IEC) will collaborate with you on the Planner & Project Implementation vision, agreeing on success consists of three (3) core steps:

- 1) Establish a System Foundation
- 2) Enable Business Processes
- 3) Success Through Managed Sustainment

## Workshops

The following workshops will assist the core project team in becoming familiar with the CWM & EWM solution.

Workshop Name	When?	Est. Length	Who should attend?	Intended Outcomes
<b>Foundation Review Workshop</b>	After foundational components are installed and configured	2 hours	CWM & EWM owner & stakeholders	✓ Familiarization with basic administration and pre-configured capabilities.
<b>Platform Overview Workshop</b>	After foundational components are installed and configured	2 hours	CWM & EWM Owners & IT Stakeholders	✓ Validate that all in-scope functionality is configured to specification.
<b>Success Management &amp; Sustainment Services (SMSS)</b>	After project is complete	1 hour	CWM & EWM owners	✓ Familiarization with key areas to be managed for immediate & long term CWM & EWM success

## Innovative-e has leveraged M365, Planner and Project to build solutions in multiple industry verticals, including:

- Manufacturing – Project portfolio and resource management with supporting reporting
- Professional Services – Developed and supported Office 365 productivity hub to manage multiple facets of their business. (M365)
- Software Development – Developed a complete solution for managing agile software projects: schedule, resources, and costs resulting in 50% increase in customer satisfaction!
