# BI Connector

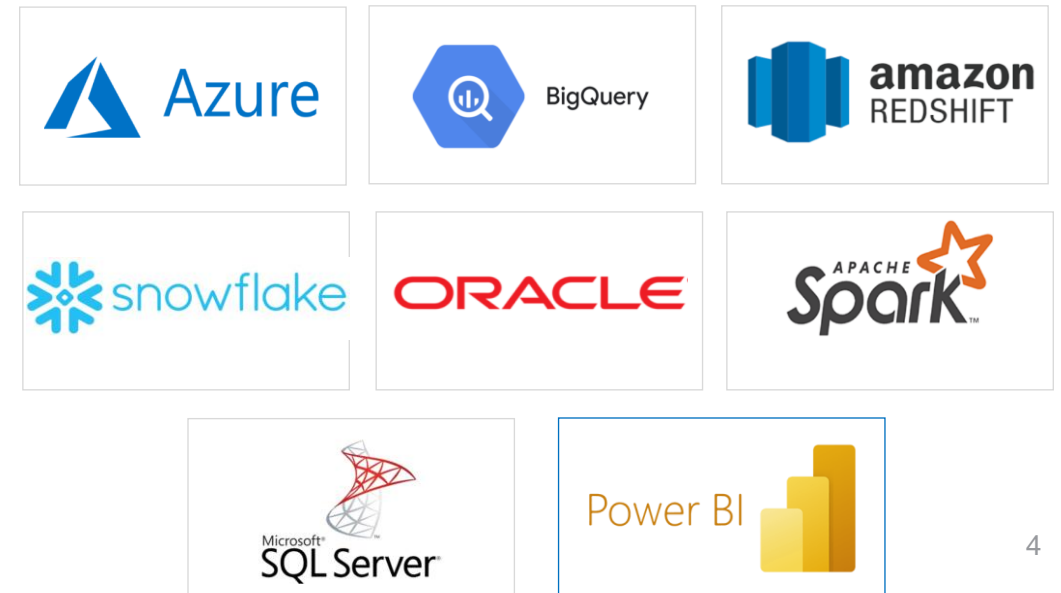

QVD to Power BI Connector is a simple and effective solution for any external applications or processes to use Qlik datasets as data sources. This connector simplifies either the connection or the migration process to integrate Qlik dataset into flat files, database tables, or into Power BI in parallel to your current processes and without any downtime.

## The key features of BI Connector are:

- 📄 Convert QVDs into Excel, CSV, or custom delimited flat files
- ✂️ Auto-create a database schema that matches QVD schema, and load data from QVDs
- 📁 Load data with full load (replace), full load (append), or incremental load
- 🗄️ Auto-create Power BI Datasets
- 🔄 Convert Qlik QVD's to JSON and upload to the Power BI Dataset
- 🗃️ Auto-create relationships between tables
- 📄 Download Power BI Workspaces/Reports
- 🔄 Refresh Power BI Datasets
- 📅 Schedule all tasks to run automatically on a schedule or event trigger

## Supported destinations:

# What's the BI Connector for?

Seamlessly load your Qlik data into your database of choice

A simple and effective solution to use Qlik datasets as data sources for other applications/BI Tools

Allows you to operationalize already modelled Qlik data with full or delta loads to your target DB of choice

Migrate your Qlik data to another BI application with all associations and transformations intact

**This connector has been a game-changer in integration and migration projects, opening up the value you can get from your current data.**

## SMB

- ✓ All targets are available
- ✓ Full load replace/append QVDs of up to 1.000.000 rows

**1 year Subscription**

**\$499** USD/month

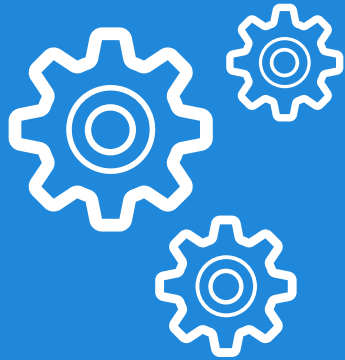

## Enterprise

- ✓ All targets are available
- ✓ Full load replace/append
- ✓ Incremental Loads
- ✓ Job Scheduler
- ✓ No limits to QVDs size
- ✓ Training Session

**1 year Subscription**

**\$989** USD/month
