Driving Business Outcomes With Dynamics 365

Dynamics 365 enables organizations to **drive better business outcomes** from advanced analytics and automation capabilities

Optimize business processes

Boost productivity

Gain insights for data-driven decisions

Improve operational efficiency

Amplify sales performance

Strengthen customer relationships

Solving Challenges In Business Specificity

We provide **tailored solutions** that address challenges of adoption, fitment to business processes, integrations and functional limitations of Microsoft Dynamics 365 and Power Platform

Data Migration

Migrating data from existing systems to Dynamics 365 CRM can be a complex and time-consuming process

Troubleshooting

Heavily customized systems require support, and finding the right support can be difficult

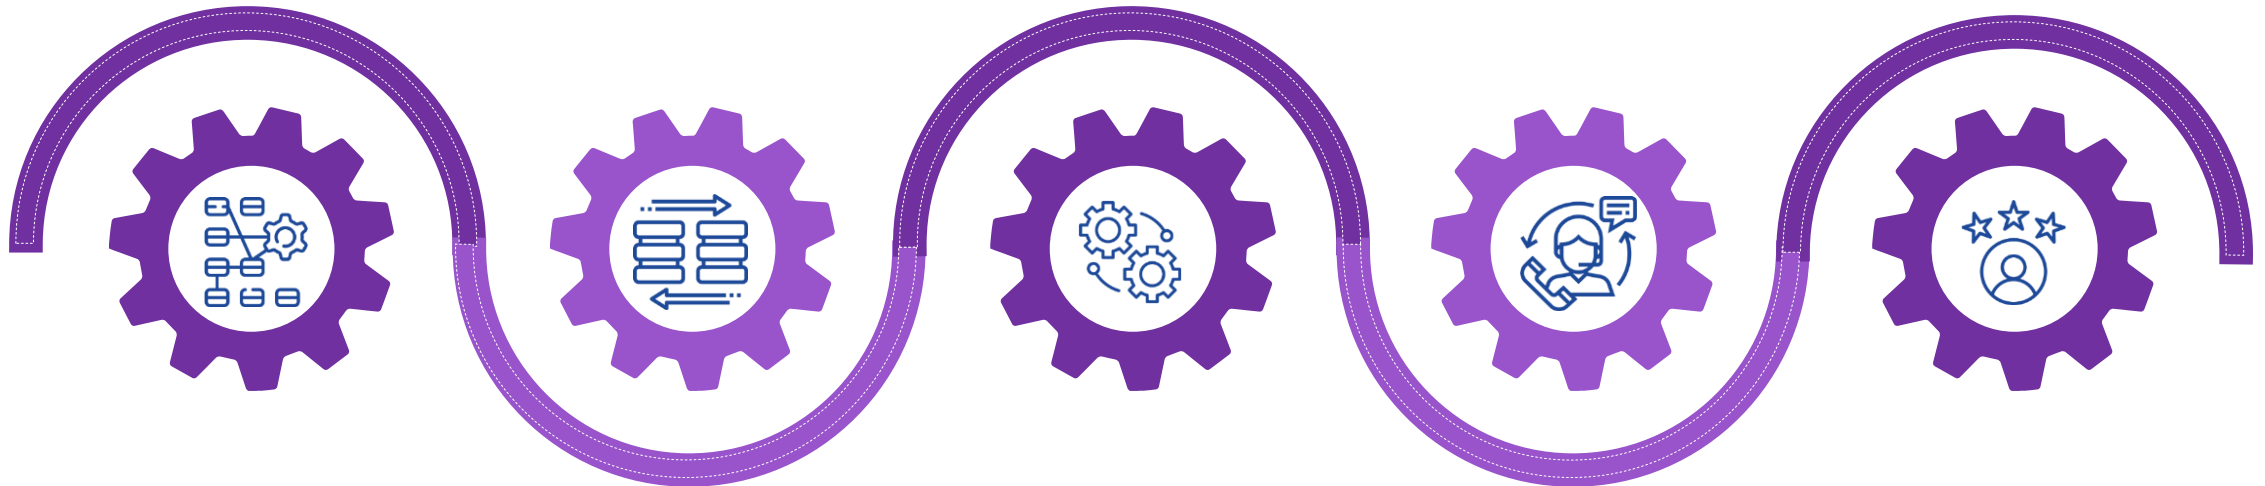

Complexity

Dynamics 365 CRM has a lot of features and functionality, which can be challenging for users to understand and customize
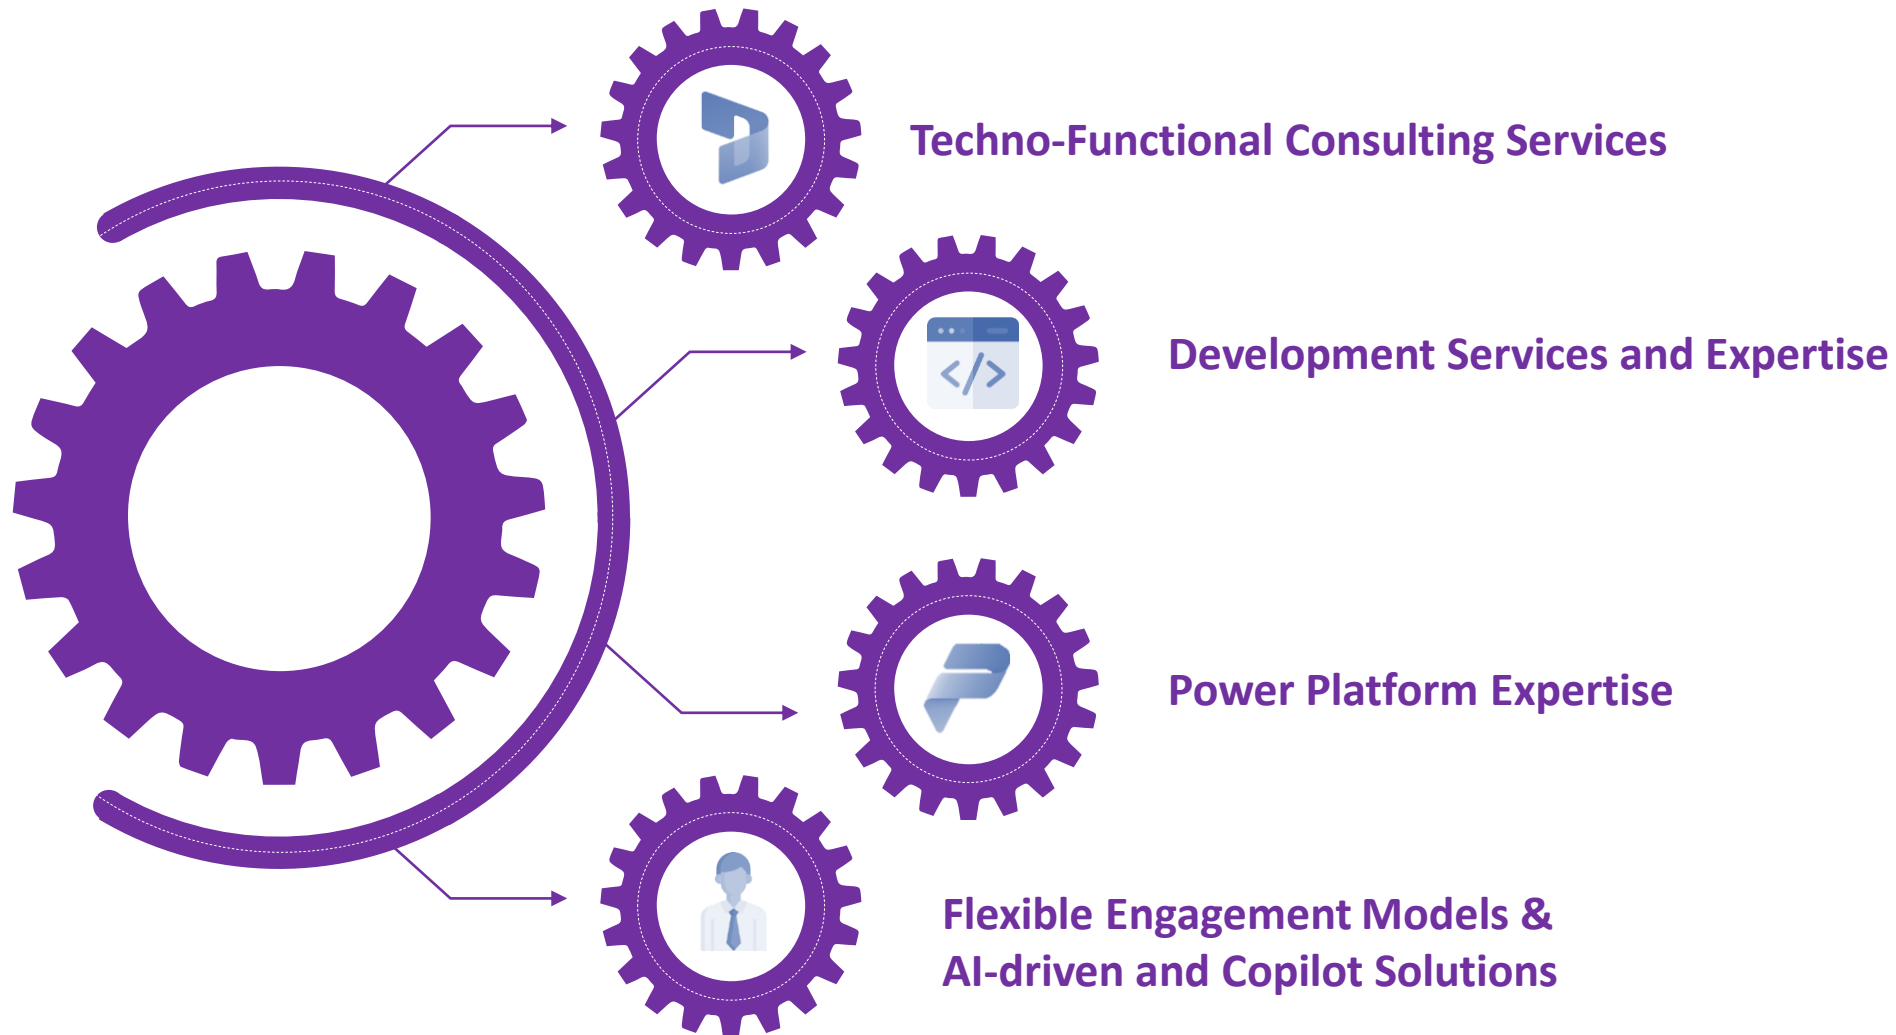

Integration

Integrating Dynamics 365 CRM and Power Platform with other systems and software can be challenging, particularly if there are compatibility issues

Expertise

Users require training on usage, customizing, and creating the software, which can be costly and time-consuming

Client Testimonials

We believe in the brands we work with. When they reach their goals, we reach ours.

Inogic has Extensive MS CRM knowledge, a very responsible team, quick turnaround on fixing issues, answering questions, and developing new features, and good quality. Inogic provides us with great help in our CRM practice: installations, IFD implementations, CRM .NET development, SSRS Reports, and troubleshooting.

Inogic provides us with a responsive resource for all CRM technical issues. Inogic has proven to be a reliable partner in our migration and development of CRM 2011 and is playing a critical role in our future upgrade to CRM 2013.

One of the biggest hurdles to overcome in dealing with a totally outsourced/ offshore group has to do with trust. Attaining full trust with project deadlines, project scope, and sensitive data. It didn't take very long before our team could trust all of the great resources at Inogic.

Emilia Arkadyev
