

1-Click Solution to Undo and Restore Data

Key Features

Undo Last Change

Restore the last changes done to a Dynamics 365 CRM record by clicking the Undo2Restore button.

History

Undo changes made in the past using History button.

Undo Changes in Bulk

Undo changes in multiple Dynamics 365 CRM records at one go using Undo2Restore button.

Restore Deleted

Restore deleted Dynamics 365 CRM records with just a single click.

Entity Support

Supports OOB as well as Custom Entities.

Available For

SUPPORTED VERSIONS

- Microsoft Dynamics 365 8.2 & Above
- Dataverse (Power Apps)

DEPLOYMENTS

- On-Premises
- Online

Entity Configuration

The screenshot displays the Click2Undo application interface within the Dynamics 365 environment. The top navigation bar shows 'Dynamics 365' and the breadcrumb 'Click2Undo > License Registration'. The left sidebar contains navigation options: Home, Recent, Pinned, Click2Undo, Help, License Registration (highlighted), Click2Undo Configur..., and Error Logs. The main content area features the Click2Undo logo and two buttons: 'ACTIVATE' and 'SEND REQUEST'. Below these, the 'License Registration' section is expanded, showing 'CRM Details' with fields for CRM URL, CRM Version (9.1), Organization, and User License (1). The 'License Registration using (*.lic) file' section is also visible. The 'Enable Entities' option is highlighted with a green box. Below this, the 'Available Entities' list includes: Action Card Type, Agreement, Agreement Booking Date, Agreement Booking Incident, Agreement Booking Product, Agreement Booking Service, and Agreement Booking Service Task. To the right of this list are '>>' and '<<' buttons. The 'Selected Entities' section on the right is currently empty.
